ERNST NURSERIES

Eaton, Ohio 1916

GENERAL INSTRUCTIONS

In presenting these instructious to our patrons we would earnestly request that you give the most careful attentiou to the details. They have heen compiled with a view to making them as simple as possible; and having fulfilled our part of the contract hy delivering first-class stock in good condition, also giving all necessary instructions how to care for it, if any of our customers should lose a portion of their stock, the fault can not be on our side. We allude to this because years of experience has taught us that people lose nursery stock hecause they neglect it; and we have taken the precaution to send a copy of our Transplanting Directions to every customer, so that none may claim that they do not know copy of ner, so t

a copy of our Transplanting Directions to every customer, so that noue may claim that they do not know how to plant and care for their stock.

We guarantee to deliver the stock in good condition, and could we plant and care for it for the first three months, would willingly insure the growth of every tree and shruh sent ont. We seldom ever lose a plant, even when we import them from Europe, and grow them here during the summer for tall delivery, and the stock is out of the ground for many weeks. Our agents report that very few of the people pay any atteution to transplanting directions. Anything that has to be cultivated in the earth can no more live without nonrishment and care than a human being.

Trees will do hetter when planted in dynamited holes if the soil is clay or hardpan, than in the old way.

PREPARATION OF THE SOIL.

if the soil is clay or hardpan, than in the old way.

PREPARATION OF THE SOIL.

For fruit trees the condition of the soil inst he such as would be adapted to grow farm crops successfully. If the land on which you are to plant your trees is not in condition to yield good crops, you can make it so hy thoroughly maderdraining, deep plowing and suisoiling. You may enrich if in the nsual manner hy turning under clover, applying harn yard manner, or where it can be obtained, vegetable mould or mulch without stint. The last is well adapted for producing a large amount of fibrous roots, and it is through these that the tree is fed.

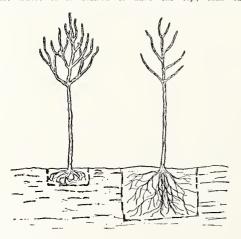

PREPARING TREES FOR PLANTING.

The hroken or mutilated portions of the roots must be cut off, so as to leave the ends smooth and sound, and the ends of all the other roots should be pruned. From these ends the new fibrous roots usually start.

The hole must be large enough to receive the roots freely, without cramping or benance: them from their natural position; the larger the better. Let the tree be the same depth it stood in the nursery (the old mark can be readily discerned) and not deeper except in case of dwarf trees. These latter should be set so that the point of nnion should come two or three inches helow the surface of the ground. The tree being held upright, the finest and best earth from the surface should be carefully worked an ong the roots with the fingers, filling every space and hringing every root in contact with it. Set the tree as firm as a post, but leave the surface filling light and loose.

PRUNING.

The stems should now he put in condition for the formation of the top by removing all the limbs to the point where it is desired to have the top; then cut

above shows the right and wrong way plant trees. Plant and trim according to Fig. 2, and you will have no trouble in making your trees grow. Fig. 1 is the method which is commonly practiced, and we can not, therefore, too strongly warn our customers hack each remaining limb, leaving from four to six huds of last season's growth. In the absence of any limbs suitable to torm a top, cut the tree down to requisite height, leaving the dormant buds to make the

The illustration herewith presents vividly the difference hetween correct and incorrect planting. In Fig. 1 too small a hole has been dng, and the roots have heen crowded into it in such a way that if the tree lives at all it will he at the cost of a great effort and loss of vitality. vitality.

The necessity of pruning vigorously at time of setting is generally a very ungrateful one to the planter, as a injures for a time the appearance of the tree to an unpracticed eye. It should, however, he unhesitatingly performed, all the branches to the extent of at least one-half the length of the previous season's growth heing removed. Care should also be used to give the proper form to the tree. The head may be left high or low, as the taste of the planter may preter, or as the nature of the tree in some cases may require.

THIS IS THE SECRET OF

Be sure and remove the lahel before tree hegius to grow or it will be fatally injured through strangulation. No stock planted in the fall should he prined until the hard frost has left in the spring, hut herore the sap starts.

starts.

The roots must have plenty of room, and great care should he exercised to have them as nearly as possible in the same position which they occupied in the nursery. In Fig. 2 the roots occupy this position, heing carefully arranged, and the top has oeen properly trimmed regardless of the great injury to the present appearance of the tree. In transplanting number the most careful management, so many of the fibrous roots which carry nourishment are destroyed that it is very essential that the top he correspondingly removed.

MULCHING.

This is done by placing a layer of coarse manure from three to six inches deep extending one or two feet further in each direction than the roots. This protects the earth about the roots against drying or baking with wind or sun, retains to it the requisite moisture, and ouviates all occasion for a practice—generally of injurious effects—the watering of newly planted trees.

A Word to You

We wish to thank you for past patronage and trust to have your order this year.

Our Motto-Is to please our customers.

Our Location-Ideal

This catalogue cost us money and we feel sure there is something in it that you can use and need. Look it over carefully and order at once-don't delay.

We have made you very reasonable prices for good stock, well-rooted, fine fruit true to name, as we depend on selling you is how we make our living, also many others who we employ. Our aim is to grow the best and choicest varieties of fruits and flowers. We cut our buds and scions from the best specimen trees, trees that grow best, bear best and have the largest and colored fruit. We endeavor to breed up-not down. We have taken pains to make this catalogue valuable to you, giving accurate descriptions of fruits and flowers as to our knowledge. If you have any suggestions to help us make a better catalogue next year we shall certainly be glad to hear from you, and will file all such information. Let us hear from you as there is always room for improvements.

Remember too, we are growers-not agents or jobbers. We welcome all visitors to come and see us, inspect our stock, get acquainted and see the hundreds of thousands of trees and plants and how a nursery is run. It will pay to deal direct—not only do you save

money, but you get better stock.

References—Eaton National Bank Preble County
Bank, State Bank of Moscow, O., First National Bank, New Richmond, Ohio, or any business or mercantile

Freight or Express-We deliver to freight or express office, and F. O. B. cars free and no charges are made for packing.

Charles E. Ernst

Express Rates—Trees and plants now go by express at a discount of 25 per cent reduction from regular merchandise rates, so it is best, quickest and cheapest to order by express. Stock always arrives in good condition. Large orders should go by freight—but all plants should go by express.

When to Order-Order on receipt of this catalogue or as soon as possible, the earlier

the better. Use enclosed order sheet, fill out carefully and write plain to avoid mistakes.

We do not replace trees or plants that fail to grow, at our low prices, but guarantee stock to leave our hands in first-class condition.

Our Liability-We use care in packing and filling orders. Our help is experienced and mistakes are few; should any occur we stand ready to rectify, and should any trees or plants prove not true to name we will cheerfully refund purchase price or replace stock on proper proof, but in no case shall we be liable for a greater sum than the invoice price of stock.

We sell only for cash with order, and should we not be able to supply you, your money is returned, as we received it. Please state if we may substitute in case we are out of some varieties you may want, and we will put equally as good, and in many cases better stock than ordered, as we know some varieties to be fine that you may not be acquainted with.

Our Packing is done in the best possible manner, in boxes and bales, by experienced people. The roots are packed in moss or excelsior and straw to protect the tops, and will reach our customers in good condition no matter how great the distance. We save you money by selling direct and if ordered early you can depend on the stock reaching you in prime condition. Use order sheet making out your order and fill it out carefully. Write name, postoffice freight station and express office, plainly.

Remittances—Remit by postoffice or express money order, registered letter, draft or If above directions are carefully observed we guarantee stock to reach you in good condition. Our stock is as good as can be grown. We are ready to put up a guarantee of \$100 that our varieties are the equal of any, no matter what prices are charged, or what agents may claim for their stock.

If any of your friends or neighbors are interested in our catalogue send us their names and postoffice address, and we will gladly mail them one.

Shipping-Our digging and shipping season begins in spring in February and continues till June. In the fall about October 1st, till hard freezing weather sets in.

ERNST NURSERIES: EATON, OHIO

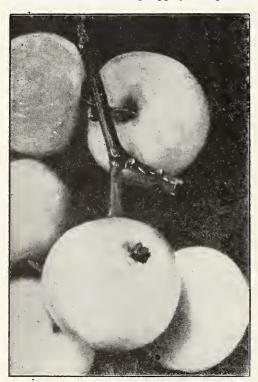

APPLES

The king of fruits. Of these we have growing 200,000 one and two-year old trees and we must say a finer lot cannot be grown. Free from disease and of the best varieties in cultivation. We are sure if you could see these trees, and if you are in the market for any, you would place your order without any hesitancy. These trees are straight, smooth and well rooted and we hope to have your order. No matter how large or how small, same will have our best and careful attention at money saving prices.

EARLY SUMMER VARIETIES

Benoni-A fine eating apple, striped and

Yellow Transparent

splashed with red. Tree upright grower. Early bearing.

Duchess of Oldenburg (Russian)—Medium to large; striped, mostly red. Best summer cooking apple; tree hardy, early and a good bearer. July and August. Tree upright grower.

Early Harvest—Medium size, round, straw color; tender, sub-acid and fine; productive. July and August.

Early Strawberry—Medium size; flesh white; tender, juicy. Bears young.

Red Astrachan—Medium; size, round, dark red on yellow ground; good market sort. Juicy, rich, acid; a good bearer. July and August.

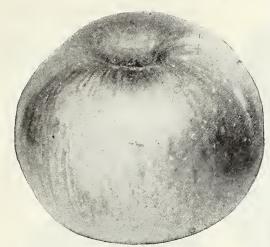

Red June—Small to medium; deep red; productive, hardy and a free grower. June and July.

Sweet June—An old variety. Medium size, round; color yellow; flesh sweet and pleasant; tree hardy and productive. August.

Yellow Transparent (Russian)—Skin clear white, changing to pale yellow when fully ripe; flesh white, tender, sprightly, sub-acid; good early bearer. July. Tree an upright grower.

Wealthy—A native of Minnesota, where it has proven perfectly hardy, vigorous and productive; fruit of large size; red streaked with white; quality good. One of the most valuable market apples grown. For summer and fall use, August and September.

Late Summer and Fall Apples

Red Beitigheimer

Alexander (Emperor)-Of Russian origin. Large, deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Very hardy. October.

Autumn Strawberry-Medium; streaked; tender, juicy, sub-acid, fine. Vigorous and producand productive. September and October.

Fall Pippin-Large, beautiful yellow when fully ripe. Flesh tender, rich and of good quality. Tree hardy, vigorous and long-lived. September.

and September. Tree is a strong, upright grower.

Gravenstein—Large, striped, beautiful, tender, juicy and highly flavored. Trees vigorous and productive. September and October.

Maiden Blush-Large, flat, pale yellow; beautiful blush, mild, sub-acid, valuable for market, cooking and drying. September.

Fall Pippin

Pumpkin Sweet-A very large, round, yellow russet apple, very rich and sweet. Tree a vigorous, upright grower. October to November.

Rambo-Medium size, greenish yellow striped with carmine, overspread with grayish bloom; flesh firm, crisr, tender, juicy, sub-acid, good. October and November.

> iety, recently introduced. Fruit large to very large; skin pale green color, mostly covered with purplish crimson; flesh white, firm, subacid. with prisk. pleasant flavor. Tree a moderate grower, an abundant bearer and as hardy as a crab. This is one of the largest and

> > apples, and promises to be extensively cultivated. September and October.

handsomest of

Do not fail to include some Ωf the orna. mental shrubs in your order.

A Plate of Wealthy

Winter Varieties of Apples

Fallawater

Arkansas Black—Tree very hardy and thrifty; an early and uniform bearer; the apple is large, smooth and round, black dotted with whitish specks, the flesh is yellow, very juicy and delicious flavor. One of the best keeping apples. Specimens have been kept until August the following year.

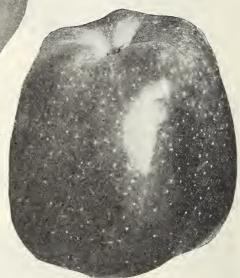

Bailey Sweet—Large; deep red; tender, rich and sweet. Vigorous, upright, good bearer. November to April.

Baldwin-Large, roundish, deep, bright red,

juicy, sub-acid, good flavor. Tree vigorous, upright.

Ben Davis—A large, handsome striped apple of fair quality; tree very hardy, vigorous and productive, a late keeper, highly esteemed in the West and Southwest.

Banana—Fruit large size, perfect in form, golden yellow, and beautifully shaded and marbled with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich aromatic flavor, and of the highest quality. A good keeper. Tree a strong grower and will thrive in any climate. Its early bearing is

Delicious

something wonderful as it generally produces a fine crop of fruit the second year. A valuable market variety. November to May. Price 5c per tree higher on all grades.

Bismarck—Stocky grower, making a small, low tree which sends out fruiting spurs and buds at a very early age. A large, handsome apple of greenish yellow, ground streaked with crimson. Excellent for cooking. October to January.

Delicious—Large, with surface almost covered with a most brilliant, beautiful dark red, blending to golden yellow at the blossom end. In quality it is unsurpassed. In flavor, it is sweet, slightly touched with acid, but only enough to make it all the more pleasing. Flesh fine grained, crisp, juicy, melting and withal delicious. In keeping qualities it ranks with the best, coming out of storage in March and April in perfect condition. It is one of the strongest hardiest, most vigorous growers among apples.

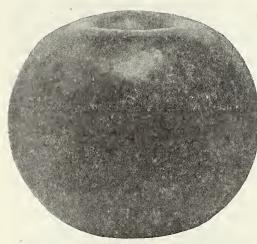

Fallawater (Talpechocken)—Very large, globular; yeılowish green, dull red cheek; juicy, crisp, pleasant, subacid flavor; tree a strong grower, very productive, even while young. November to January.

Gano—Tree very healthy, vigorous, hardy, having stood 32 degrees below zero without injury. A rapid grower, large and spreading in orchard, fruit spurs numerous, shoots long and smooth, brown, with protuberances on the limbs like the Ben Davis. An early, annual and prolific bearer; fruit of fair quality. The foliage is large and dark. Season, February to May.

Golden Russet—Medium size, dull russet, flesh high flavored, delicious, vigorous and heavy bearer. December to May.

Grimes Golden (Grimes Golden Pippin)— An apple of the highest quality; medium to large size; yellow; tree hardy, vigorous, productive. November to March.

Greenville (Dawnings Winter Maiden Blush)—New, from seed of the

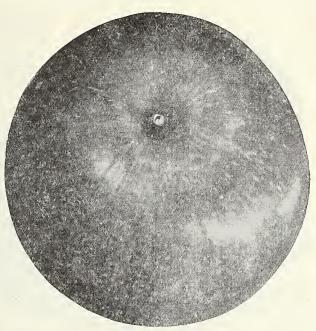

Gano

popular Fall Maiden Blush, which it closely resembles in size, color, flavor and productiveness, but it is a better grower and keeps all winter. We have been growing it for several years and are well pleased with it.

Gideon—Raised in Minnesota. An upright grower; medium to large; color yellow, with vermilion blush on sunny side; mild acid; quality very good. December to March.

Huntsman—Large; golden yellow, with bright red cheeks; nearly sweet; fine flavor, very aromatic. One of the best and highest selling market apples. Tree very healthy and moderately productive; vigorous. November to January.

Hubbardston Nonesuch—Large, handsome, yellow, overlaid with red; tender fleshed, with distinct, delightful flavor. Strong grower and

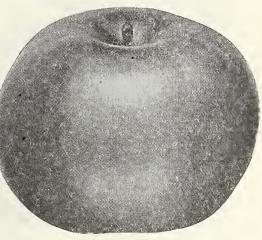

Hubbardson's Nonesuch

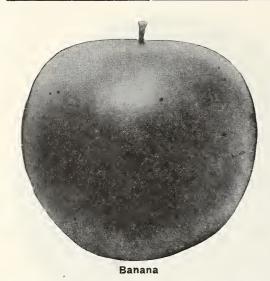

heavy bearer. A native of Hubbardston, Massachusetts. Season November to January.

Jonathan—Origin, New York; season, November to January. A seedling of Spitzenburg, which it resembles in fruit, and is a much better tree. Hardy in latitude of Central Iowa, where it is a vigorous and productive variety. A delicious and strictly dessert apple that always commands highest market prices. Fruit good size, roundish; surface is very smooth, clear light yellow, almost covered with rich dark red on sunny side; flesh white, tender, juicy, spicy, aromatic.

Janet Rawle's—Medium, roundish, ovate; greenish yellow, striped with red; crisp, rich and juicy, one of the best in the South and Southwest. January to March.

King

King—Large and handsome; striped red and yellow; tree vigorous and productive; one of the best. November to March.

Mann (Ditz)—Medium large; roundish, oblate nearly regular; deep yellow with brownish red side; flesh yellowish, juicy, half tender, mild sub-acid; good keeper, recommended for cooking and market. Tree vigorous; upright grower; and early and annual bearer, January to May.

Mammoth Black Twig—Very large, dark red, nearly black. Tree hardy and very productive. Very valuable market variety in the West. November to April.

Milan—Medium size. Tree is thrifty and very productive. Thin skin, dull yellowish or greenish marbled. November to March.

McIntosh—Medium size, nearly covered with dark red; flesh white, fine, very tender, juicy and refreshing. A good annual bearer of fair, handsome fruit. Resembles the Fa-

meuse, but larger and more hardy, and fully equal in quality to the standard sort. October to February.

Missouri Pippin—Large, oblong, bright red, with numerous gray dots, very handsome, and of fair quality; and early and very abundant bearer, and very profitable orchard fruit, vigorous. December to March.

Northern Spy—Large, roundish, slightly conical, somewhat ribbed; striped with the sunny side nearly covered with purplish-red; flesh white and tender, with a mild sub-acid, rich and delicious flavor. The trees should be kept open by pruning, so as to admit the air and light freely. January to June.

Northwestern Greening—Origin, Wisconsin. Season December to March. Tree a spleadid vigorous grower, quite hardy. Fruit large to very large; green becoming yellowish-green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive; should be given plenty of room in the orchard to secure large even fruit. One of the best growers we have in the nursery, and in the orchard is very prolific and bears regularly when mature.

Opalescent—Large, shapely, clear yellow, nearly covered with brilliant red. Tree vigorous, roundish open shape. Flesh distinctly tinged with yellow, moderately tender, juicy, agreeable mild sub-acid, aromatic, good to very good.

Pewaukee—A seedling from Duchess of Olddenburg. Fruit medium to large, surface bright yellow, partially covered with dull red, flesh yellowish-white, crisp, juicy; flavor subacid, rich, aromatic, spicy, something like the Jonathan; quality good. Tree strong grower and very hardy. December to May.

Price's Sweet—A good winter apple; medium size. Tree good grower and bearer. A few trees should be in every orchard.

Rhode Island Greening—Fruit medium to large. Tough, waxy, grass green, varying to yellow. Tree large, strong and vigorous. Crisp, tender, juicy.

bright red, flesh yellowish, tender, juicy, subacid. A popular market sort in many sections. November to February.

Smith's Cider—A handsome fruit; large, oblong, somewhat flattened; skin yellow, changing to red; flesh tender, juicy, crisp, with pleasant sub-acid flavor. Dec. to March.

Scott's Winner—This is a very hardy variety and has been long tested. An early and profuse bearer; flesh yellowish white, slightly red near the skin. Sub-acid in quality. December to June.

Stark—Large, roundish, golden yellow, moderately juicy, mild, sub-acid. The tree makes a strong growth, bears early and in abundant, regular crops. One of our best apples. January to May.

Stayman's Winesap — It is now attracting attention everywhere as a profitable market variety. It has large size, bright red

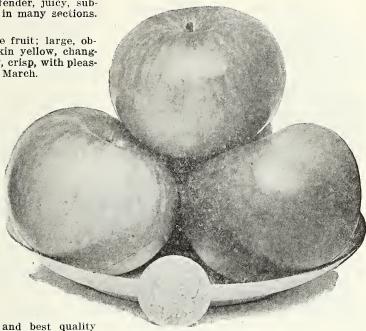

color, great productiveness and best quality to commend it. The tree is a vigorous grower and like its parent it is irregular and drooping in habit, and adaps itself readily to different soils and situations. Season Nov. to Feb.

Talman's Sweet—Origin, Mass. Season Dec. to March. One of the most popular of the old eastern varieties. Tree is vigorous, upright, spreading and very productive. Fruit above medium, whitish yellow, often with faint flush on sunny side; flesh white, firm, moderately juicy, fine grained, rich and sweet; quality excellent for a sweet apple.

Wagener—Medium to large; deep red in the sun, flesh firm, sub-acid and excellent; very productive, bears very young. Nov. to Feb.

Stark

Pewaukee

Winesap—Medium; dark red; sub-acid, excellent. Tree a moderate grower and abundant bearer. A favorite market variety in the West. November to May.

White Winter Pearmain—One of the favorite old-time winter apples. A medium-sized yellow apple, roundish, tapering and pointed at the blossom end. A tough smooth, waxy skin, fine grained, crisp, firm, juicy flesh, very good quality and a delightful fragrance. The tree is a strong grower, spreading, vigorous, hardy except in the extreme North. Bears in six to seven years. Season December to March.

Wolf River—A beautiful fruit of the very largest size. Originated near Wolf River, Wisconsin, and may well be classed among the ironclad. Skin greenish-yellow, shaded with crimson; flesh white, juicy, tender with a peculiar, pleasant, mild sub-acid flavor. Tree a strong, stout grower and great bearer. January and February.

Wealthy—Originated in Minnesota. Hardy, vigorous and very productive. December to February.

York Imperial—Of medium size, truncated, oval, angular, skin greenish-yellow; flesh tender, crisp, aromatic. Highly esteemed. November to January.

DWARF APPLES

The following do best as dwarf. Varieties; Red Astrachan, Baldwin, Bismarck, Maiden Blush, Duchess and Yellow Transparent.

Prices: 3 to 4 feet, 35c each; 3 trees for \$1.00.

Crab Apples

At the same prices as other list of apples. Crab apples should be planted twenty-feet apart: They are very hardy and bear young and abundantly.

Gen. Grant—Large, round; yellow, striped with dark, almost black, red on the sunny side; flesh white, fine grained, mild sub-acid. Oct.

Hyslop

Hyslop—Large, roundish-ovate; dark red, with a blue bloom; flesh yellowish, excellent for cider; tree hardy. One of the most desirable crabs for culinary purposes. October to December.

Martha—Immensely vigorous, hardy, producing every year. Fruit large, yellow with heavy blush of light red, flesh nne grained, firm; flavor sub-acid, very juicy and exceptionally fine for cooking. October.

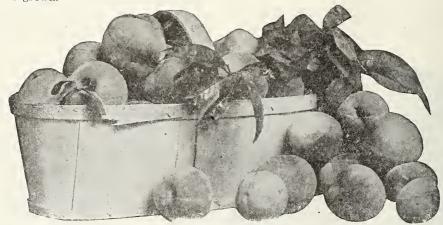

Transcendent—One of the largest and finest of this class of apple. Tree a strong grower and good bearer, very hardy and much sought after in the North and Northwest. Skin golden yellow, crisped with rich red. Flesh yellow, crisp, juicy. Excellent variety for general use. September to October.

Whitney—Large; splashed with carmine; flesh firm, juicy, rich. A great bearer and very hardy. Tree a vigorous, handsome grower. Has no superior, if an equal. August.

Yellow Siberian—Medium, round, golden yellow. Vigorous grower. Ripens in September.

PEACHES

Are one of our specialties. We grow them by the hundreds of thousands, as they grow well with nice, clean roots, free from diseases, in our new land. We bud only on the best and hardiest seedlings. Our pits are gathered on the mountains of Tennessee and North Carolina especially for us. We guarantee our trees thrifty, healthy and free from diseases and we grow the very best varieties only for market and home use. Our prices are the lowest for as good as can be grown.

Basket of Elbertas

Special at \$3.00 per hundred as long as they last, varieties selected by us. We have a few thousand trees 2 to 3 feet, that we will sell you at \$3.00 per 100. Varieties must be left with us to select. These are all budded of good varieties, labeled true to name and we will guarantee the trees and fruit to please you. Do not think because our prices are low the stock is not good, for we assure you they are as good as the best; try our stock and be convinced. Cut these 2 to 3-feet trees, 4 to 6 inches above ground when planted and see what a fine orchard you will have in two years.

PRICE OF PEACH TREES

Each Doz. 1000 \$90.00 First class, 5 to 6 ft._\$0.15 \$1.50 \$10.00 First class, 4 to 5 ft._ .10 1.00 8.00 75.00 6.00 50.00 38.00 4.00 By mail postpaid 2 to 3 feet, 10c each; \$1.00 per dozen.

Fifty trees at hundred rates; five hundred trees at thousand rates.

Admiral Dewey—A perfect freestone, of fine size, form and color, with delicious yellow flesh that is firm enough to ship well. The tree is strong, hardy, symmetrical grower and produces well. The very best early yellow freestone. July.

Banner-Large, yellow with crimson cheek. Flesh yellow, firm, rich, excellent. Good shipper; early bearer, and productive. One of the best late market varieties. October.

Beer's Smock (Free)—Medium to large, round; creamy white with dark red blush; flesh yellow, tender, rich, good quality; a regular and enormous bearer, making it very desirable for market purposes. September.

Belle of Georgia-Roundish white peach, a

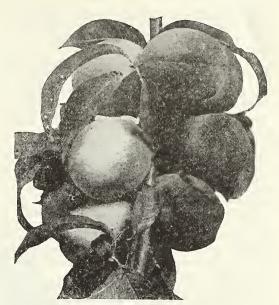

Banner

little oblong, one side slightly enlarged, tinted with a red blush on the sunny side and striped and splashed with a bright red. Flesh white, firm, juicy, rich and sugar-sweet. One of the most delicious peaches grown. July.

Carman (Free)-Large, broadly oval peach, creamy white, with a red cheek. Flesh tender, white, tinted with red near the seed. Juicy with a fine, rich, sprightly flavor. a truly remarkable peach. August.

Chair's Choice (Free)—Fruit of very large size; deep yellow with red cheek; flesh yellow, firm and of good quality. Tree strong grower and productive. Last of September.

Captain Ede-Large, beautiful yellow, with delicate carmine on one side; remarkable for its freedom from rot and good shipping qualities. Freestone. Sept.

Beer's Smock

Chinese Cling-A large creamy white peach, finely shaped and marbled with red; the white flesh is red at the stone, very juicy, rich and refreshing. First of August.

Champion-A Western peach of very large size and good quality. Specimens measuring ten inches in circumference. Skin creamy white with red cheeks; flavor delicious, sweet, rich, juicy and surpasses all other varieties. Perfect freestone. August.

Crawford's Early (Free)—A magnificient large, yellow peach, of good quality. Its size and beauty make it one of the most popular orchard varieties. August and September.

Carman

Crawford's Late (Free)—Large, roundishoval, yellow with broad red cheeks, flesh yellow with red at the pit; melting, vinous and very good. Late September

Crosby (Free)—Medium to large, orange-yellow splashed with red; flesh yellow, red at pit, juicy and rich; tree hardy and prolific, has stood 22 degrees below zero without injury to the tree or fruit buds; a popular market sort. Middle of September.

Elberta—Large, yellow with red cheeks; flesh yellow, firm, juicy of high quality. Exceedingly prolific, sure bearer and hardy. It is the best general sorts for all sections. One of the leading market varieties. Exceptionally large and fine. September 10th to 15th.

Foster—Large, resembles the Early Crawford in appearance, but is much larger and somewhat earlier. Color deep orange-red becoming very dark on the sunny side; flesh yellow, rich and juicy with sub-acid flavor. August and September.

Fitzgerald—An improved Early Crawford, being fully equal to it in size, quality and color; in Canada and Michigan has proved to be one of the hardiest. Fruit large, brilliant color, bright yellow suffused with red; small pit; flesh deep yellow, best quality. Last of Aug.

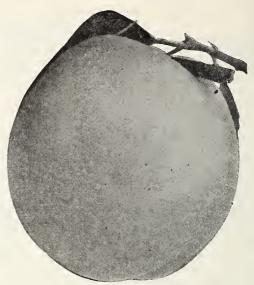

Globe—Fruit large, globular in form; flesh firm, juicy, yellow, shaded with reddish-crimson towards the stone, quality good; very rich and luscious. September.

Gold Drop—The almost translucent gold-colored flesh of this peach renders it exceedingly attractive in market where it sells at highest prices. The tree is hardy, bears early and profitably. Late September.

Greensboro-The largest and most beauti-

Cap't Ede

Lemon Free

Hale—It is the most wonderful peach grown today. It is claimed a strong grower. A better grower than the Elberta, one of the hardiest on account of the bud being a late bloomer. An excellent shipper; very best flavor and high color. We think every one interested in peach growing should give this variety a trial as it fills the requirements wanted by all peach growers. We hope to give a more definite and accurate description later on after we have given this variety a thorough trial. Ripens about one week before Elberta. With its large size, high color, strong growth and all the good qualities asked for, it will come to the front as the leading variety in a very few years. We have only

a limited amount of these and offer these as long as the stock last. 5 to 6 feet, trees to offer this season 35c each; 3 for \$1.00. 4 to 5 feet, 25c each; 5 for \$1.00.

3 to 4 feet, 20c each; 6 for \$1.00.

Heath Cling— The most satisfactory clingstone known, very large, creamy white, with delicate blush; white flesh juicy and tender. October

Hill's _ Chili— Large, downy tame yellow, with slight blush, flesh yellow, luscious and well flavored; pit small. Tree hardy and productive. Bears large crops when most other sorts fail. Late September. Favorite sort for canning. The Michigan peach king.

Heath Kling—The most satisfactory clingstone known, very large, creamy white, with delicate blush; white flesh, juicy and tender. October.

Kalamazoo—Origin, Michigan. Medium size; slightly oblong; yellow, shaded with red; juicy, rich, melting; a good cooking fruit and for nearby markets. Middle of September.

Lemon Free—Almost lemon shape, pointed at the apex; color a pale lemon yellow when ripe. Large size and excellent quality; a valuable market sort. Ripens after Late Crawford.

Lemon Cling—This is one of the most beautiful of all yellow-fleshed clings. Flesh firm, yellow, slightly red at the stone, adhering firmly, with a rich, sprightly, sub-acid flavor. September.

Mayflower—Earliest peach known. Unlike the Sneed and the other early varieties it is a red peach, absolutely red all over, even before it gets ripe enough to ship. Carries to market in fine shape and sells well as it is the only early peach that is well colored. Tree an upright, good grower, a very prolific bearer.

Mountain Rose (Free)— Large, handsome yellow, with red cheek, flesh white and juicy; one of the best early peaches; should be in every collection. August.

Matthew's Beauty-Large-

ly planted as the most valuable succession for Elberta. Large in size; golden yellow, streaked with red; flesh thick, firm, fine. Its good shipping qualities make it an exceedingly valuable variety for market. September.

Niagara—A New York variety, ripening just after the Elberta. The fruit is uniformly large, beautiful and luscious. An excellent shipper. Tree is very hardy and resistant to diseases, bearing annually very heavy crops.

Old Mixon (Free)—Large, roundish, slightly oval; pale yellow with a deep red cheek; flesh tender, rich and good quality; succeeds well in all localities. September.

Prolific—A choice large yellow peach, valuable for succession to Early Crawford, for its fine shipping qualities, its beauty and its good quality. Of strong, thrifty growth, hardy and productive. September.

Salaway (Free)—Fruit large, roundish, deep yellow, with a rich marbled, brownish red cheek; flesh yellow, firm, juicy, rich and sugary. An English variety; prized as a late, showy market sort.

Stearns—A new Michigan peach which originated in South Haven, Mich., and has been a most prolific grower. A perfect freestone, with yellow flesh and brilliant red skin. Tree is a strong, upright grower, extremely hardy and free from disease. Considered the best market peach grown. July.

Stump (Free)—A showy, white fleshed peach with a bright red cheek. Very large, juicy, sweet and good. Tree is average grade as to vigor and productiveness. Is freestone and ripens near the end of September.

Triumph (Free)—A valuable commercial variety. Medium to large, round, somewhat flattened; greenishyellow; flesh yellow with red stains; juicy; luscious; very good; early sort. August.

ALL TREES LISTED IN THIS CATALOG ARE GUARANTEED TRUE TO NAME

Quinces

Quince

Quinces can be planted in low, heavy soils, damp and soggy, where no other fruit will thrive. What fruit is better liked and has the fine flavor as that of the quince? None. Try quince honey, jelly, preserves, or flavor other fruits with quince—it has no equal. Still, many have no quinces. Plant a few this spring sure. The varieties we name are the very best.

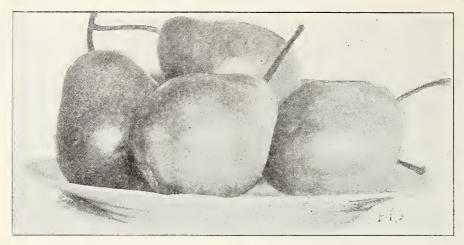

Each Doz. 100

First Class, 3 to 4 feet ____ .30 3.00 20.00
First Class, 2 to 3 feet ____ .25 2.50 15.00
Mail Size, postpaid, \$2.50 doz.

Angers—This variety is not budded and while it is small it is an abundant bearer, a good grower and an excellent quince for cooking. We offer these trees in 3 to 4 feet at 15c each, or \$10.00 per 100. We have a fine lot stock this year. Other varieties of quince are all budded stock.

Champion—Very large and handsome; flesh cooks as tender as an apple without hard spots; flavor delicate; tree very handsome and bears abundantly. One of the most valuable sorts. Color greenish-yellow.

Meeche's Prolific—Very large, bright yellow, quality very good; larger than the Orange and similar to Champion in shape, of great beauty and delightful fragrance. Bears early.

Orange—Large, roundish, somewhat irregular with a small and short neck at the base; fine golden-yellow flesh and of excellent flavor. October.

PEARS

The production of pears in this country is not up to the demand. There is a vast undeveloped field for growers of pears. Very few home markets are well supplied with this luscious fruit. The fruit is in good demand in all the large cities and when carefully packed and graded bring good prices as fruit stand grades. Wonderful profits are made by some growers with this fruit. The pear tree will thrive on any soil and will bear profitable crops on a shallow soil, but it does best on a loose clay. Early and Autumn Pears should be picked ten days before fully ripe, and allowed to ripen in the house. This greatly improves the flavor of nearly all kinds, while some are nearly worthless if allowed to ripen on the tree. Winter pears should be picked before severe frosts, and placed in a cool cellar till it is desired to ripen them, when, if placed in drawers in a warm room, they will ripen in a few days.

DWARF PEARS

These are budded on Quince seedlings. The varieties marked with a star, thus (*) can be supplied in dwarf as well as standard form.

Dwarf Pear trees, 3 to 4 ft., 25c each; \$2.50 per doz.; \$20.00 per 100.

SUMMER VARIETIES

*Bartlett—Large size, often with a beautiful blush next the sun; buttery, very juicy and high flavored. Tree a strong grower, bearing early and abundantly; very popular. Last of August and first of Sept.

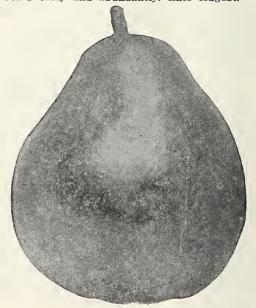

*Clapp's Favorite—A large, fine pear, resembling the Bartlett, but without its musky flavor; pale lemon yellow with red cheeks; fine texture, melting, buttery, juicy, with a rich sweet, delicate vinous flavor. Tree hardy and very productive, very desirable in all sections, and especially so where other varieties fail. August and Sept.

Early Harvest—Fruit is large golden yellow, with a fine red cheek; flavor poor but it sells well in the market because of its size and color and éarliness in ripening; ripens one month before the Bartlett.

*Koonce—Originated in Southern Illinois, has been largely planted and is a very successful early market pear in that and other sections. A strong, upright grower; hardy; has produced crops when all other varieties were

killed by frost. Fruit medium, yellow with carmine cheek, ripens with the earliest. July and August.

*Margaret—Of medium size, golden green with russet cheek; so rich and delicious as to be generally pronounced the finest pear of its season. Forms a shapely, vigorous tree, bears early and abundantly. Late August.

Clapp's Favorite

*Tyson—Rather large, bright yellow with brown cheek; melting, sweet and delicious. One of the finest summer varieties. August.

*Wilder—Very early resembling Summer Doyenne, claimed to be a good shipper for an early pear. Small. First of August.

AUTUMN PEARS

Anjou—A large, fine pear, buttery and melting with sprightly flavor; tree a fine grower and productive; one of the best. October to January.

Clairgeau—The fine size and exceeding beauty of this pear renders it most valuable for market. The smooth yellow skin is shaded with orange and scarlet; the flesh is yellow, juicy, aromatic and somewhat granular. Tree bears early and abundantly. October and November.

*Duchess—Among the largest of all really good pears. Greenish yellow splashed with russet; flesh white, juicy rich flavored. Succeeds well as standard but grown as dwarf is the most profitable and luscious of market varieties. We recommend it highly for the home garden. October and November.

*Flemish Beauty—Large size; greenish yellow and brown; rich and juicy. An old and highly esteemed variety; strong grower and great bearer, hardy and desirable. In season during Sept. and Oct. is

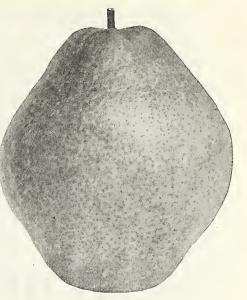

*Howell—Large, waxen yellow, sprinkled with minute russet dots; flesh whitish, juicy, brisk and vinous; vigorous grower, prolific bearer. A valuable variety. Considered very hardy in the West. September to October.

*Kieffer—Tree a remarkable grower, with so vigorous a constitution that it rarely if ever blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house ripened, October and November.

*Lawrence—Medium to large; golden yellow, with melting, aromatic flesh; unsurpassed as an early winter pear. Tree hardy, healthy and productive, bearing large crops annually. November to December.

Worden Seckel

Keiffer

is a vigorous, healthy and a prolific bearer. February to March.

*Seckel—Small; rich yellowish brown; with a bright red cheek; juicy, buttery and melting; excellent; very productive; a fine grower of the best and highest flavored pears known; September and October

Sheldon—Fruit rather large; roundish, yellowish, nearly covered with light russet; slightly shaded with red; flesh very juicy, melting and delicious; tree hardy, vigorous and good bearer. One of the best varieties. Has never been known to blight. October

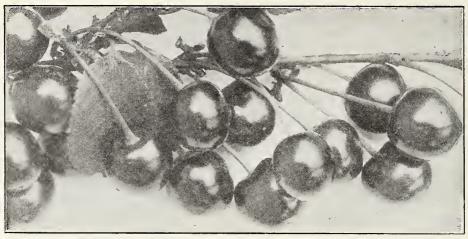

*Vermont Beauty—A beautiful new seedling pear; medium size, roundish ovate, yellow; nearly covered with carmine; flesh melting, sprightly, fine quality, tree healthy, hardy and productive. October.

Worden Seckel—Originated in Oswego county, N. Y. It is a seedling of the Seckel, and is equally as good in quality as that variety, and more juicy with an aroma equally as rich and inviting, while in size, color, form and appearance it is decidedly superior. The color is

yellow with light red on sunny side. The tree is very hardy and an enormous bearer, and the fruit is ripe just after the Seckel. All lovers of good pears should have trees of this variety.

Remember we can supply all of above varieties in standard trees, and only those marked by a star, in dwarf.

Special prices will be quoted on Kieffer pear trees where 100 or more are wanted, as we have a large stock of these. Write for prices in quantities.

Large Montmorenci Cherries

CHERRIES

There are few more desirable trees than the cherry. It can be planted in all kinds of soil and it will thrive on the street, lawn, along fences, avenues, and in many places where other fruits would not be profitable. Cherries always find a ready market at profitable prices and the trees need little attention either as to spraying or pruning, making it an ideal fruit for the city or town yard or garden. The Duke and Morello sorts are acid or sour cherries, and the Hearts and Bigarreaus are sweet varieties. Cherries usually come into bearing two years after planting if they are well cared for.

Rockport

SWEET VARIETIES

well on the tree and is very popular. June.

Napoleon—Of fine appearance and the very largest size; yellow and amber, with bright red blush; flesh firm, juicy and delicious. Profitable for market; finds a ready sale both for canning and dessert. Forms a grand tree that ripens its heavy crops in July.

Allen—Of fine size and appearance, glossy crimson black; meaty, firm sweet and delicious, it sells for the highest price paid for cherries in the market. Part of the fruit frequently ripens late and is marketed in August; so far it has been free from all rot and disease. Late July and August.

Black Eagle—Large red-black, with tender, rich and juicy flesh of high flavor. Early August.

Black Tartarian — This fine old variety produces an immense crop of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth; late July and early August

Gov. Wood—A rich and delicious large, light red cherry that hangs

Rockport—Large, light red and amber; half tender, sweet and good. Late June and early July.

Schmidt's Bigarreau—Heavily clustered fruits of largest size, deep

crimson-black, tender, juicy,

flavored. July.

Windsor — New, introduced from Canada. Fruit large, liver colored, resembling the Black Heart, but quite distinct; ripens a few days earlier than that variety; flesh remarkably firm and of fine quality. The tree is hardy and very prolific. The most validation

ably firm and of fine quality. The tree is hardy and very prolific. The most valuable late variety for market or family use. July.

Yellow Spanish—Large, pale

yellow with a bright red cheek in the sun, the flesh is firm, juicy and delicious. Season end of June.

Dyehouse—Partakes of both the Duke and Morello in wood and fruit; a very early and sure bearer; ripens a week before Early Richmond, of better quality and quite as productive.

Early Richmond. (English Pie Cherry)—An exceedingly productive and reliable old variety, with dark red fruits of medium size and sprightly acid flavor. Unsurpassed for cooking. June.

English Morello—Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor, late. Tree very hardy and recommended for extremely cold latitudes.

Late Duke—Large, light red, late, excellent. This fine cherry should be in every collection. Last of July.

Large Montmorenci—Larger and finer than Early Richmond, and one of the finest flavored cherries in this class. The strong, hardy tree makes rapid growth and bears enormous crops. Valuable for canning and preserving. One of our best cherries. Late June.

Louis Phillippe—Large, roundish, regular, stalk rather short and stout; skin rich dark red; tender, mild acid, and very good. Tree vigorous and productive. Middle to last of July.

May Duke—An old, well known, excellent variety; large, dark red, sub-acid, rich. A su-

Early Richmond

perior and productive old sort that holds its own well against newcomers. Middle of June.

Ostheimer—Large, heart shaped, nearly black when ripe, juicy and rich, fine for dessert and cooking; unsurpassed for market. Trees bloom late and bear fruit quite young. One of the most productive of all cherries.

Reine Hortense—A French cherry of great excellence; fruit very large, roundish, elongated; skin bright red; tender, juicy, nearly sweet, delicious. Last of July.

Wragg—Large, roundish, heart-shaped; dark crimson and when fully ripe, black or nearly so; flesh and juice light crimson, firm and good, very productive; one of the hardiest and is usually a sure cropper.

Downing Mulberry

Mulberries

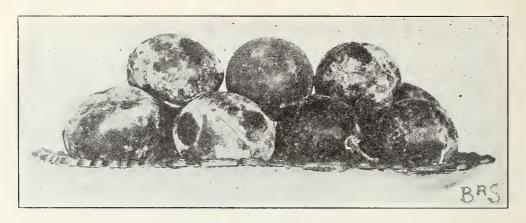

Valuable for shade and ornamental purposes as well as for the fruit; being rapid in growth, and very productive. The everbearing sorts fruit three months

First Class, 5 to 6 ft. each ______ 50c First Class, 4 to 5 ft. each _____ 35c

Downing's Everbearing—A fine rapid growing tree with large foliage and attractive for the lawn, and at the same time bears a delicious fruit for three months

New American—Fruit large, black, of fine quality and tree vigorous; a good bearer and highly ornamental for the lawn.

Russian—Very hardy, vigorous grower; valuable for feeding silk worms and for timber. Fruit of small size, varies in color from white to black. Largely planted for hedges, windbreaks, etc., in all the Western states.

PLUMS

The plum delights in a cool, not too dry situation, and good rich soil. Plant in rows north and south with trees 10 to 15 feet apart in rows far enough from each other to give good air circulation. The varieties we offer have been thoroughly tested, and are standbys. These may be relied upon to furnish yearly crops of this most highly profitable and exceedingly delicious fruit.

EUROPEAN VARIETIES

Bradshaw—Very large; dark violet-red; flesh yellow, juicy, good. A productive, valuable market sort. Middle of August.

Diamond— A superb and showy Plum of enormous size; dark purple, with thick bloom; vigorous, hardy, productive. September.

German Prune—A valuable plum of fair quality for dessert, but most esteemed for drying and preserving. Large, long oval, purple with a thick blue bloom; flesh firm, sweet and pleasant, separating from the stone. Moderate to vigorous in growth. September.

General Hand—Very large; yellow, handsome; parts freely from the stone. Tree stocky, vigorous and productive. September.

Grand Duke—A valuable late plum, with large and showy violet-red fruits that are entirely free from rot; of fine quality. Grows moderately and produces well. A good sort for home and market. Late September.

Gueii—Large, deep bluish purple, with thick bloom; flesh yellow, coarse, but sweet and good. A valuable sort for cooking and market. September.

Green Gage (Reine Claude de Bavay)—Medium size, roundish, oval; skin greenish yellow, marked with red in the sun; flesh yellow, juicy and of excellent flavor. Tree a good grower and productive. Last of September.

Imperial Gage—Above medium size, oval, golden green; flesh juicy, rich, delicious, free from stone. Tree of good growth and habit, productive. One of the very best Plums and

very popular in some sections of the country. August.

Italian Prune (Fellenberg's)—A fine, late plum; oval, purple; flesh juicy and delicious; parts from the stone; fine for drying. Tree very productive. September.

Lombard—Medium size, oval, violet red; flesh yellow, juicy and pleasant. A great bearer and particularly adapted to light soils. Tree vigorous and hardy; succeeds when most other

Bradshaw

Abundance

varieties fail. The most popular and profitable plum under general cultivation. Last of Aug.

Mary—A very beautiful plum of the highest quality. Of medium size, golden yellow, with a delicate white bloom; flesh thick, sweet and delicious. Of sturdy, spreading habit, with glossy foliage; really ornamental. Bears annual and heavy crops. August.

Monarch—Tree very thrifty, hardy, healthy and handsome. Fruit largest size; often six inches in circumference, dark purple, nearly round. Flesh pale yellow, parts freely from stone, pleasant, juicy and of extra quality. An early and regular bearer.

Moore's Arctic—A new hardy variety, which originated in Maine, of medium size or below, skin dark purplish black, with a thin blue bloom; flesh greenish yellow, a little coarse, juicy, sweet. Tree vigorous, an early and prolific bearer. Last of September.

Shropshire Damson (Prune Damson)—An English variety of great merit for preserving. Large and much more desirable than the common Damson. Tree vigorous grower, very free from attacks of curculio; hardy, and an abundant bearer. October.

Yellow Egg—A very large and beautiful eggshaped yellow plum; a little course, but excellent for cooking; tree a free grower and very productive. Late August.

JAPAN PLUMS

Abundance (Botan)—Large to very large, oblong, amber, nearly covered with bright red and overspread with a thick bloom; flesh orange yellow, juicy, melting and of delicious sweetness; stone small and flesh readily parts from it. Tree a strong grower and an early and profuse bearer. Ripens in advance of other plums. Valuable for canning and market.

Burbank—The Burbank plum stands at the head of the celebrated Japanese varieties. It is proving remarkably successful the country over. No other plum ever became so popular in so short a time. This is because it is practically curculio proof and is free from black knot. It has been fruited from seven to nine years in this country and is perfectly hardy (said to stand 30 degrees below zero). Ripens in August. It seems to succeed on any soil, sand, clay or loam. It can be picked green and will ripen and color up perfectly and will not lose its flavor. Will keep fully two weeks in perfect condition after ripening. Abundant yearly bearer, fruit large, roundish, dark red or purplish, with thin lilac bloom, flesh amber yellow, melting, juicy, with rich sugary flavor, stone small and free, bears second year after planting.

Red June—Fruit medium to large, cordate and very prominently elongated at the apex; deep vermillion, red all over, with a handsome bloom, very showy; flesh light lemon-yellow, firm and moderately juicy. Tree vigorous and productive. Ripens before Abundance. August.

Apricots

A beautiful and delicious fruit; a close relative to the plum and peach, combining the qualities of both.

				ŀ	Lach	Doz.
4	to	5	feet	\$	0.25	\$2.50
3	to	4	feet		.20	2.00

Alexander (Russian)—One of the best of this new class. Large, oblong; mottled with red; flesh yellowish, sweet and of delicious flavor. The tree is very hardy and an immense bearer. July.

Moorpark—One of the largest; orange-yellow with numerous specks and cots; flesh yellow, sweet, juicy and rich; tree somewhat tender and fruit is inclined to ripen unevenly. August.

Royal—Large, roundish-oval; pale orange with faintly tinged red cheek; flesh yellow, firm, sweet, highly flavored, slightly sub-acid and good quality; ripens a week earlier than Moorpark; a good market variety.

Superb (Russian)—Medium, roundish-oval, smooth, light salmon with numerous red or russet dots. Flesh yellow, firm, sub-acid and good; tree hardy and productive; middle of July.

Nectarines

Same prices and sizes as Apricots.

Early Violet—Medium size; skin yellowishgreen, with a purple cheek. Flesh melting and tender. Rich, highly flavored, juicy and a freestone. Last of August.

Elruge—Medium, green'sh-yellow with a dark red cheek; flesh of a pale yellowish-green and of a very rich fine flavor; tender and juicy. Early September.

Persimmons

American—Fruit somewhat similar to the plum, yellow when ripe, sweet and good after exposure to frost.

4	to	5	feet,	, eacl	1	35c
5	to	6 1	fe e t,	each		50c

Japan—Fruit large, often 2 to 2 1-2 inches in diameter; skin light buffish-yellow. Flesh dark brown, sweet, crisp and meaty; good

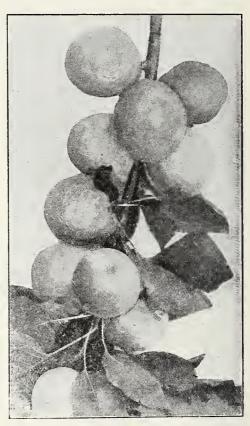

while still hard; a good keeper, one of the best for market. Tree a good grower.

4 to 5 feet, each ______ 50c

Pawpaws

Asparagus

This earliest and finest of spring vegetables is among the easiest curtivated and most profitable. A bed once planted suffers no deterioration for thirty years or more if it is properly attended to and well manured. Plow or spade the ground at least a foot deep, work in and mix with the soil, thoroughly, plenty of rich, well-rotted manure. For field culture plant in rows three and one-half feet apart and one and one-half in the row. But for home use it may be planted one and one-half feet apart each way and some three inches deep. Keep the ground clear of weeds, and spread on a good coat of rich manure every fall.

The Asparagus bed is very apt to be neglected in the early fall. September the tops should be cut, and the bed or field cleared of weeds. Before the first of

We have an extra fine lot of plants to offer this year at special low prices for twoyear old plants.

Giant Argenteuil

Horseradish

10c per doz; 50c per 100; \$4.00 per 1,000. If by mail, add 5c per doz, 15c per 100.

Horseradish should be in every garden. There is nothing better for cold meats and all kinds of vegetables. It is also much relished by some grated and stewed. Try some.

Doz. 100 1.000 __\$0.25 \$0.60 2 year old roots ____ \$5.00 If by mail add 15c per 100.

Colossal-This variety is much Conover's superior in size and quality to any of the old common sorts, being remarkably tender and fine flavored.

Giant Argenteuil-A new French variety that makes crowns strong enough for cutting before any other sort and yields enormous crops of mammoth tender stalks.

Palmetto-Until recently we believed that the Conover's Colossal was the best sort known but we are forced to concede that the Palmetto is earlier and a better yielder and more even and regular in its growth and that eventually it will supersede the old favorite. It has been tested both north and south and has proven entirely successful in every instance.

Rhubarb or Pie Plant

10c each; \$1.00 per doz; \$4.00 per 100.

A deep, rich soil is indispensable to secure large, heavy stalks. Plant in rows four feet apart, with the plants three feet distant. Set so that the crowns are about one inch below the surface. Top dress in the fall with stable manure and fork under in the spring.

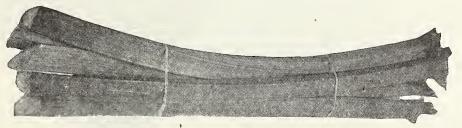

Linneaus-Leaf stalks large, tender, juicy, produced quite early.

Queen-The extra large, tender stalks are a decided pink color, and delicious for canning or cooking. A very strong growing sort.

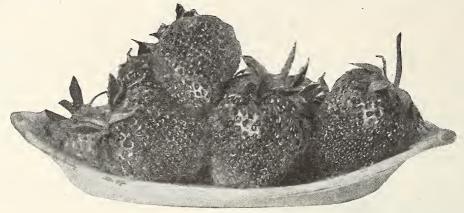

Sage

10c each; 75c per dozen.

Holt's Mammoth-Plants of strong growth. Leaves very large, borne well above the ground, are of unusual substance, strong flavor and superior quality.

Queen Rhubarb

Pocomoke

STRAWBERRIES

Our strawberries are taken from young beds, fresh dug before shipment, plants are well rooted and not dug from old or run down beds. These plants are from beds that have never borne a crop, and will bring you best results. Plants are packed in crates and moss about their roots, and should be sent by express only to insure their safe arrival and in best condition to plant. We give varieties of the best, and which we grow at lowest prices for best plants.

We positively do not ship out cold storage plants and do not store them for shipment in any manner. The plants we ship are fresh dug plants only. Please remember to order early

so that your plants will reach you in prime condition.

We want to impress upon our customers the necessity of ordering strawberry plants early, so they can be shipped in cool weather, as strawberry plants cannot be shipped in hot weather and come through in good condition.

Aroma—This is our best and most profitable late strawberry. It cannot be beaten for quantity of fruit produced, or in quality of fruit. Plants show no weakness of any kind. Fruit very large, roundish conical, rarely misshapen, glossy red, of excellent quality and produced in abundance. Same season as Gandy.

Beder Wood—This variety was originated by Beder Wood of Illinois. We have fruited it for many years, and found it to be a very heavy bearer of good size, roundish fruit. Does well on nearly all soils. Season early, a good staminate to fertilize early varieties like Crescent, Warfield, etc. The plant is a good, healthy, grower, and sends out a number of large runners. Beder Wood is very deep rooted and will stand drouth better than most varieties.

Bubach—This berry has been thoroughly described year after year but for the benefit of those who have not grown them we would say the fruit is of the largest size, and not at all unusual to find berr'ss weighing an ounce to an ounce and a quarter. It will do well under

poor cultivation, but responds freely to good food. The plant is perfect, having dark foliage, very stout crown and a prolific grower.

Chesapeake (Stam.)—Late. It is a seedling and has many good points of many good varieties. The plants are large, vigorous, rustless and without an inferior point. Foliage thick and upright, with an almost round leaf. It is a large stemmed variety and much of the fruit is held from the ground by them. They are similar in size to the Gandy, but more productive, firmer and of better quality. Green tips are unknown in the Chesapeake. It is a good producer on any land that will grow strawberries. One of the best late strawberries.

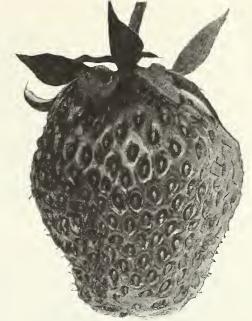

Crescent—Medium size, vigorous and productive. An old, well known variety.

Gandy—This is one of the most valuable late strawberries. Berries large, uniform, bright scarlet, showy and handsome; firm and of good quality. The plants are very vigorous and productive under good culture.

Jessie—On moist soil it is a robust, healthy, plant; long, stout fruit stock; holds the fruit well up from the ground; berries of the largest size, medium to dark red color all the way through; firm and solid, and of the most excellent quality; very few small berries and none of the largest ones of irregular shape. Season medium.

Klondyke—The plant is of moderate size, vigorous, free from rust, and a good plant maker. Fruit is large, regular conical from dark red clear through. In productiveness it surpasses the Gandy and equals it in size and in the lateness of the last berries. It is a very profitable southern berry.

Marshall—Season late. Berries deep blood red to center; flavor very much like the wild berry. Foliage large and vigorous. While it will

Bubach

not yield quite as many quarts to the acre as some medium sized berries, yet it is the best extra large berry. It makes comparatively few runners in hills to get the largest berries.

Parson's Beauty—Bisexual. This variety produces extraordinary yields of bright red berries, having a delicious mild flavor, which is retained after being cooked, a fact that makes it popular for canning purposes. During the last few years this variety has won special favor in cold latitudes.

Michel's Early—Long been known as the extra early berry. It should always be grown in hedge row, when it is very productive. It makes runners very freely and many have

Bisexual. Very large, both in foliage and fruit.

A strictly fancy berry and most attractive in appearance and flavor.

Very prolific; a good shipper.

Pocomoke (S)
This variety

of our

one

best and most profitable straw-berries. The berry is round and resembles the old Wilson, but is much larger. One of the best varieties, not only for its enormous productiveness, but on

is

account of its beauty, adaptability to all soils, its foliage enduring the dry hot weather, its large size, its deep color, its firmness and high flavor. The plant is a strong, robust grower, with deep roots and lots of them. It ripens evenly, and is one of the best shippers yet introduced. We guarantee entire satisfaction with the Pocomoke.

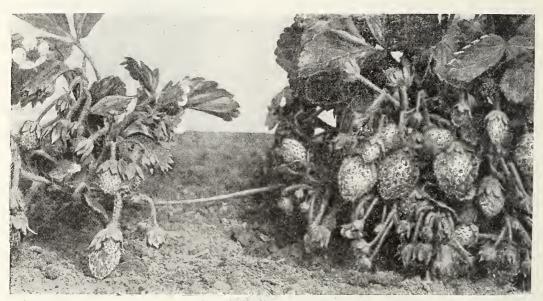

Pride of Michigan—The berry is of good size and color, being dark red to center. It is a very firm berry, making a good shipping variety, and is also a perfect flowered sort. making a good pollenizer for pistillate sorts. A very thrifty and strong upright growing plant, setting plenty of runners. It is second early.

Sample—A strong plant that succeeds well on nearly all soils and yields astonishing crops of uniformly large, fine berries, pointed, conical, rich scarlet, firm and of fair quality. A money maker for the market man and destined to become one of the standard sorts for all sections. It is being planted in immense quantities.

Senator Dunlap (Perfect)—Mid - season. Greatest all around berry ever introduced. Bears heavy crops of bright red deliciously flavored fruits. Of regular shape and size always juicy and sweet, yet firm enough to be shipped.

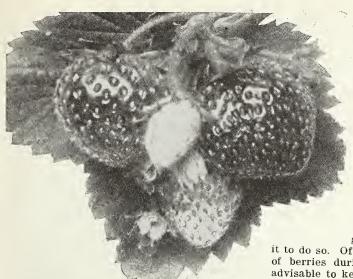

Uncle Jim—Is a good grower, of large, stocky plants, well spaced for fruiting. The fruit is large high colored, quite firm and of good quality.

Warfield—Great beauty, firmness, earliness, productiveness and vigor make this berry most popular. Ripens with Crescent and is superseding it for canning.

Everbearing Strawberries

We have thoroughly tried out the Everbearing Strawberry the past two years, and we cannot recommend these wonderful plants too highly. Just think of strawberries of the very finest quality, berries of large size, sweet and delicious, requiring less sugar than the annual bearers. We also find the plants to stand the drought better although laden with heavy crop of fruit as was the case in 1914 and we picked berries up until November When these berries were first introduced we did not think much of them as a commercial berry, but we are now compelled to change our mind. Some claim they can make from \$1000 to \$2000 per acre with proper cultivation and attention with these remarkable berries. live it can be done. Besides producing heavy crops of fine fruit they are wonderful makers and we believe all plants ordered of these remarkable berries is the best investment you are able to make in the last few years. We could fill this catalogue with testimonials if we had space, for the hundred of visitors who has visited our place all during last summer had to acknowledge they had never seen any thing like their equal before. Let us assure you that few who saw them left without placing an order for from 100 to 200 up to thousands of plants. These are true facts and we assure you, you will not regret placing an order for Everbearing Strawberry Plants no matter how few or how many. If you could only see these plants and fruit growing, taste them we are sure you would not hesitate in placing your order. We welcome all visitors to come and see them, but to those who cannot we urge you to place your order at once, so you will not be disappointed in getting a start next year, as the demands for these are enormous and we anticipate a shortage of these plants long before the season is over.

Superb

Americus—This variety is, all things considered, one of the best of the fall bearing kinds for the amateur to grow. The Americus will produce about as many berries as the other sorts on light and sandy soils, the fruit will be of average size and the flavor equal to or better than Marshall in June. But on clay and other kinds of strong, rich soils, Americus will run very large and fine, in fact the largest of any fall bearing berries are secured from Americus on strong clay soils. A shortcake made of Americus in August or September is the most attractive dish you could imagine.

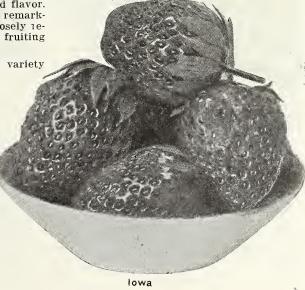

lowa—A fall bearing strawberry introduced by M. Crawford of Ohio, who is well known as an authority on strawberries. The berries are large, nearly round, somewhat inclined to be conical, and are of fine appearance and flavor. It is a good plant maker and responds remarkably to good soil and cultivation. It closely resembles Progress in size, form and fruiting habits.

Progressive—This new fall bearing variety seems to be a very good one. The new runner plants produce a nice lot of berries of good quality. The berries are not so large as Superb and not so good quality, but they yield well and, we think, will be one of the best known varieties of fall bearers in a few years. The fruit of the Progressive is of good size, smooth, of good color and appearance. Progressive plants are still very scarce and price is higher than the others. Our stock is limited, but our plants, being grown on new ground, are extra strong and well rooted.

Superb—This variety is our choice among all fall bearers. You should have seen our fruiting patch this

summer. We are sure that if you could have visited us and seen that bed any time from June till the middle of November you would not hesitate a minute about ordering a good supply of this marvelous variety. Superb is great plant maker and the are great big, plants fine, sturdy fellows. It is in a class by itself among the fall bearers, for it is one of the heaviest bearers of berries in June as well as a remarkable fall bearer. During the first summer it will produce a fair crop of fruit of good size, and notwithstanding that, it will come back in the spring with a bumper rop of the highest grade fruit if you will allow

it to do so. Of course if you want a large crop of berries during the summer and fall it is advisable to keep the vitality of the plants up till the June berries are out of the way by keeping the blossoms pinched off. You will then get a continuous crop of fruit from the time the early berries are gone until the snows of winter. During the second year the crop of fruit it is possible to gather from this variety is simply stupendous. The better the cultivation and the richer the soil, the greater and more continuous the crop will be. There seems to be no limit to the possibilities of these plants in producing fruit if you keep them in growing condition. We want you to share our pleasure this year in watching Superb bring forth its wonderful fruit. The price is the same as for the other kinds. We are only able to offer them at the same prices as the others because we have grown such a large stock of them.

BLACKBERRIES

Our blackberry plants are fine and mostly grown from cuttings, all are well rooted and will grow the finest and largest berries. This list consists of the best old and new sorts.

Blackberries are among the best-known and most valued of our berries. No fruit of any

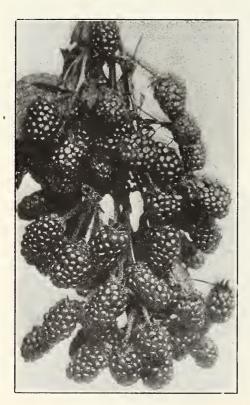

Blackberries are among the best-known and most valued of our berries. No fruit of any kind is more wholesome. Blackberries should be planted in rows six or seven feet apart, three to four feet in the row. Keep the ground light, rich and clean and pinch the canes back when they have reached four feet in height.

Ancient Britton—Well adapted by its great hardiness for planting in all sections subject to severe winters. The strong healthy canes are heavily laden with sweet, melting berries of medium size. Markets well.

Early Harvest

Mersereau

Blowers—Originated in the celebrated small fruit belt of Chautauqua county, N. Y., where it has been thoroughly tested for several seasons. Claimed to be the hardiest, most productive, the finest quality and brings on the market the highest price of all blackberries. Has produced 2,694 berries on one bush; 2,720 quarts on one-third acre. Large size, jetblack, good shipper, best quality, unexcelled productiveness are the main characteristics of this splendid new sort.

Early Harvest—Dwarf, very early, quite productive of sweet medium sized berries. Needs protection in the North.

Eldorado—The vines are very hardy and vigorous, enduring the winters of the north-

west without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters, and ripen well together, they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired. Perhaps the most valuable sort in cultivation.

Erie—Berries large and nearly round, appearing thus even larger than they really are; of good quality. The canes are strong, with heavy foliage, hardy free from rust supporting heavy crops of fruit. Ripens between Early Harvest and Wilson.

Mersereau—For years we have been looking for a blackberry that was hardy enough to stand our winters without protection and at the same time be of good size and firm enough to ship to distant markets with success. Mersereau fills the bill. Fruit is as large, glossy and firm as the Wilson. Stands shipping as well and sells for Wilson on any market. More productive than Wilson. Will out-yield all other blackberries in quarts

Ohmer—This variety makes a good cane growth. The berry is first-class quality and large size.

acre. A wonderful cropper.

Rathburn—Of very large size, resembling Wilson, and fully its equal, adding iron-clad hardiness to its good qualities. The berries are sweet, luscious, have no core, and are firm mough to ship and handle well. The canes make strong erect growth, yielding fine crops.

Snyder—Berries of medium size, sweet, melting. Very hardy and wonderfully productive. Leads where hardiness is a consideration; early

Stone — Vigorous grower; Blowers the wood is stocky, short jointed and ripens early. Fruit turns dark red, is very hardy, medium size, black and glossy when ripe; delicious flavor.

Taylor—A good succession for Snyder in cold climates. Ripens its large, luscious berries some weeks later. Vigorous, hardy, fruitful. Very sweet, no core or seeds. A fine shipper, also a fine table and canning berry.

Wilson—A very superior, large, early berry, of sweet and excellent quality. Strong growing, amazingly fruitful, very early to ripen.

Ward—Originated in New Jersey. Jet black color and firm for shipment, tender and melting, without core, and of highest quality. Canes strong and stocky, carrying an enormous crop of fruit without staking.

Texas Everbearing—A new novelty in blackberries.

We offer for the second time the

Texas Everbearing, which was found on the Congo River, in Africa, a few years ago, and was brought to the coast by a man named Texas. It is a strong grower, very hardy and claimed to be the only everbearing blackberry known.

The bloom is white, as large as a silver dol-

lar. Berries brick red when green, and when ripe jet black and as large as an English walnut; very sweet, no core or seeds. A fine shipper, also a fine table and canning berry. Plants are grown from sucker or root cuttings. It is absolutely the very best blackberry grown from a commercial standpoint.

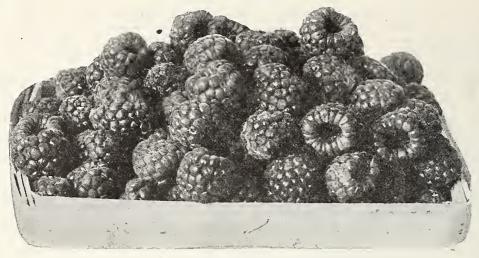

These are the claims and description given us by the growers where we have secured our supply of plants. Will give our report after we give them a thorough trial. We believe it will pay to give them a trial if only a few

plants are purchased. Our supply is limited and we suggest that you place your order at once for this wonderful berry. Price, 10c each; \$1.00 per dozen; \$5.00 per 100.

Dewberries

Plant in rows six feet apart, three feet distant in the row. Keep the soil mellow and clean. 25c per doz.; \$1.25 per 100; \$10.00 per 1,000.

Lucretia—The very best of the blackberry family. Berries are far larger and incomparably better than any blackberry; of unequaled excellence. The Lucretia Dewberry has received the highest praise from the best horticulturists in the country. Hardy, a great bearer, fruit large, black and glossy, without hard core and very delicious. Ripens with early blackberries.

Haymaker

Raspberries

The plan most commonly recommended for laying out the raspberry plantation is to plant in rows from six to eight feet apart and two or three or more feet in the row; but recent experience has convinced us that there is a much better plan. We now plant raspberries in hedge rows; plant one foot apart in row and rows twelve feet apart. The dense hedge row smothers out all weeds in and near the row, rendering cultivation easier and quicker; keep this space between the rows well and frequently cultivated. It is a well known fact that raspberries are always larger, finer and sweeter if grown partially in the shade; the hedge row furnishes this condition. It also stays the young canes against the wind twisting and breaking them, resulting in more and better canes, more and finer fruit, and rendering easier and quicker culti-

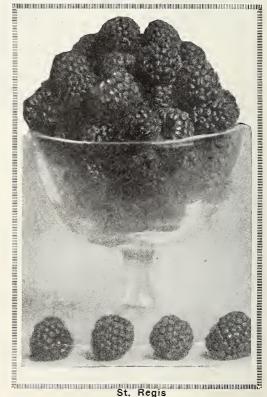

vation. Give this plan a trial and you will soon be convinced of its advantages over the old way

RED, PURPLE AND YELLOW VARIETIES

Cuthbert—A remarkably strong, hardy variety; stands the Northern winters and Southern summers better than any other variety. Berries very large conical, rich crimson, very handsome and so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious. The leading variety for main crop.

Cardinal—Very vigorous and productive of excellent quality. Highly recommended.

heres to the bush much longer and retains its shape better, both on the market and for canning. Bush a strong grower, attaining a very large size. One of the hardiest and wonderfully prolific. Unexcelled for productiveness, stands at the head for canning, jam, etc. Should be planted two feet farther than any other variety.

Golden Queen—This variety is a seedling of the Cuthbert, but the color of the fruit is a rich golden yellow. The flavor is of the highest quality. Its size is equal to the Cuthbert; immensely productive; a very strong grower, and hardy enough even for extreme Northern latitudes, having stood uninjured even when the Cuthbert suffered. The desire for a yellow

Haymaker (New)—The most vigorous grower of all raspberries. Very hardy. Fruit very large, conical; color bright red and very attractive; flavor superb; delicious for table use and splendid for canning. It is a prodigious bearer, of long season; fruit of fine texture; does not drop from the bush. A superb shipper.

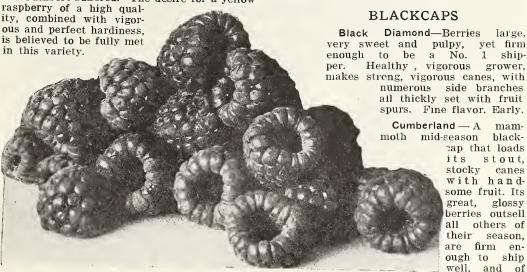

King—Several of our best fruit growers consider this the best of the early red raspberries. It has large and attractive bright red fruits of good flavor, ripening with the earliest and firm enough to ship nicely. In hardiness, growth and productiveness all that could be desired.

London—A seedling of Turner crossed with Cuthbert. A valuable new sort; color red; hardy and productive; begins to ripen with Cuthbert, but continues during a longer season.

Miller—This new red berry is as large as the Cuthbert; bright red color, which holds after picking; does not fade. Stout, healthy, vigorous grower. Berries large, round, small core; do not crumble; firmest and best shipper; rich fruity flavor. Commences to ripen with the earliest and continues a long time.

Ruby—Seedling of the Marlboro, originated at Marlboro, N. Y., has fruited for seven years, is shipped daily from there to the Boston market through the season. Ripens with the earliest, continues a long season. Fruit large, bright red, exceedingly firm, excellent quality. Strong grower, large, hardy canes. At Marlboro the most profitable early commercial sort among the bright red sorts, and should be tried everywhere.

St. Regis"Everbearing"—This variety proved its worth again during the season of 1914, producing fine crops of fruit. Begins to ripen with the earliest and continues to bear on until October. Berries bright crimson, large size, rich sugary raspberry flavor. Flesh firm and meaty. A good shipper. Wonderfully productive, the first or main crop equal to any red variety known. Canes stocky, of strong growth, with abundant dark green leathery foliage. Try it.

Columbian

good quality. In hardiness and productiveness, among the best. Cumberland is very hardy, having withstood a temperature of 16 degrees below zero without injury. Extra productive, being the heaviest bearing variety now grown. Fruit is jet-black and of extra fine quality. Ripens before Gregg. We bought our stock of plants of the introducer. Buy the Cumberland for profit.

Eureka—This is a very valuable extra early black-cap, as it produces a heavy crop of large berries and ripens them early, while they are selling at a fancy price. A fine black cap in every particular. We have grown Eureka berries one inch in diameter. Unexcelled for fancy fruit. We guarantee Eureka to please you in every respect.

Gault—A chance seedling from Ohio. Canes thrifty and hardy. The first crop ripens about with Gregg, is more abundant and continues in bearing three or four weeks, by which time the new canes begin to fruit and continue until checked by the frost. This latter crop does

not consist of a few scattering berries, but immense clusters, often numbering 100 berries on a single stalk. Fruit large size and delicious flavor.

Gregg—For many years the leading black cap for market. Its large, showy berries are produced in great abundance, are firm and a good shipper.

Kansas—Plant is a strong grower, fruit jet black, as large or larger than Gregg, a splendid yielder and hardy. One of the very best. Ripens before Gregg.

Plum Farmer—While this is not a brand new sort, having been grown in New York State for several years, it is not widely disseminated. Fine grower, being more free from diseases of black caps than other varieties. It ripens very early and most of the fruit is produced in one week. It will out-yield any black cap we have ever seen. The fruit is very large, thick meated and very firm, making a good berry to evaporate or ship to distant markets.

GRAPES

Grapes can be put to a great variety of uses and not only are they more useful than other fruits but they thrive on almost any soil and in any climate, north, east, south or west; on hillsides, in valleys, on rich or poor land. The beauty of grape vines as an ornamental as well as fruitful vine fcr arbors, pergolas and porches has been sadly over looked. They can be used effectively to cover the ugliness of unsightly fences, at the same time giving an abundance of healthful fruit for the household, as well as a surplus for market. As a commercial proposition the grape holds a well deserved position and its great length of line and hardiness will always make it a profitable and favorite fruit.

bloom; these a enough to keep ably, but the ter readily from the a quality that is preciated; the

BLACK VARIETIES

Concord

Concord—The fine old market leader, with large, handsome clusters of large, luscious grapes. Entirely hardy, productive and reliable; succeeds well over a great extent of

country. One of the best known grapes. Sept.

Campbell's Early-The superb new grape is fulfilling the promises made for it remarkably well. forms large and handsome clusters, thickly set with large. round berries. covered light purple

bloom; these are firm fleshed enough to keep and ship admirably, but the tender pulp parts readily from the few small seeds, a quality that is now greatly appreciated; the flavor is rich, sweet and delightful. The clusters ripen early, and hold their

berries well, keeping in fine condition for a month or more. The vine is vigorous and bears abundantly. Should be widely planted.

Early Ohio—A profitable early market grape, with excellent shipping qualities; has strong, thrifty, hardy vines.

Eaton—Seedling of the Concord. Bunch and berries of largest size, showy and attractive. Leaf large, thick and leathery; berries round,

covered with heavy blue bloom; pulp tender, separating freely from the seeds.

ive's Seedling-Long bunch, medium to

large, medium size berries, thick, tough skin, flesh sweet, pulpy, somewhat foxy. Colors before fully ripe. Highly esteemed for red wine.

McPike—This mammoth black grape has been exhibited in all parts of the country, its great size, fine flavor and beauty creating quite a sensation. It is a seedling of Worden and has many of the good qualities of both Worden and Concord. The bunches are large, even and compact; the berries three inches in circumference, covered with a rich bloom; they are of delightful consistency, rip.ning evenly and keeping well when shipped long distances. The vine is very strong and thrifty in growth, with great, leathery leaves. Ripens before Concord.

Moore's Early—Clusters of medium size; berries large, round, black with heavy blue bloom. Desirable for market on account of its earliness; well suited to Canada and northern portions of the United States by its hardiness; succeeds admirably in the South also.

Worden—Promises to be very popular. Bunch large, shouldered and handsome, berry large, black, skin thin, flesh sweet, much like the Concord and ripens a few days earlier. Vine hardy, vigorous and productive.

RED GRAPES

Agawam—Berries quite large, with thick skin, compactly set upon a large bunch; soft, sweet and sprightly, ripens early. Grows and bears well.

Brighton—Bunches large and well formed; berries medium to large, of good flavor and quality. An excellent grape ripening with Delaware.

Catawba—Well known as the great wine grape of Ohio, Kentucky, etc. Bunches large and loose, berries large, of coppery red color, becoming purplish when well ripened; two weeks later than the Isabella, and a month later than the Clinton. Requires long seasons.

Delaware—A choice native grape of free and hardy but slender growth, deserves a place in every vineyard or garden. Bunches and berries are small but compactly set, light

red, with violet blcom. Sugary and delicious. A favorite dessert grape; one of the earliest to ripen.

Salem—This is regarded as the best of Mr. Rogers' hybrids. Bunch large, berry large, round; flesh tender, juicy, rich.

Vergennes—Originated at Vergennes, Vt. The originator says of it: "Clusters large, berries large; color light amber; flavor rich and delicious; ripening here fully as early as Hartford Prolific. Its keeping qualities are superior."

Woodruff—Bunches and berries very large; vine vigorous, healthy and productive; fruit of excellent quality and keeps well. Ripens little before Concord.

Wyoming—Vines very hardy and healthy and robust, with thick, leathery foliage; color of berry similar to Delaware, but brighter, being one of the most beautiful of the amber or red grapes, and in size nearly double that of the Delaware; flesh tender, juicy, sweet, with a strong aroma. Ripens before Delaware.

Moore's Early

WHITE GRAPES

Diamond—This handsome and valuable new grape is a seedling of Concord, has the same sturdy qualities of vine, and ripens its fruit several weeks earlier. Its berries are about the same size, smooth, with no brown dots and few seeds. They are juicy, sweet and almost free from pulp. One of the best of recent introductions.

Empire State—Healthy, strong grower, and very hardy; clusters large and shouldered; berry medium, nearly round, white, with a slight tinge of yellow, with a heavy white bloom; quality medium.

Green Mountain—Greenish white; skin very thin; pulp exceedingly tender and sweet. Vine strong grower, hardy and productive. Originated in the mountains of Vermont. Quality extra, and promises to take front rank for garden and vineyard culture. Ripens early.

Martha—A light colored seedling of the Concord; the bunches are rather loose shouldered; flesh is juicy, with a sweet delicate flavor.

Niagara—Home and market growers seem to agree that this is the most valuable of all the white grapes. Its clusters are large and handsome, compactly filled with large berries, having a thin but tough skin. When fully ripe they are a fine pale yellow, with a thin white bloom, and foxy aroma of an earlier stage has almost disappeared; the flesh is slightly pulpy, sweet and delightful. The vine is remarkably vigorous and productive. Ripens with Concord.

McKinley—A new early white grape. A cross between Niagara and Moore's Early. Strong grower, healthy, robust foliage, equal to Niagara. Bunches large, compact and handsome; berries large, nearly round, green at first, turning to yellow when fully ripe, very sweet, extra quality, a good shipper, remarkable keeper; will hang on vines sound and perfect for weeks after ripe.

McKinley

Pocklington—Clusters and berries large, light golden yellow when fully ripe; sweet and tender, with little pulp. Thoroughly hardy and healthy; bears well in favorable seasons and locations. Ripens after Concord.

CURRANTS

Currants should be planted in good very fertile soil, with liberal manuring, and the tops should be cut back nearly to the crown, allowing only three or four canes to grow the first year. Plant in rows five or six feet apart and three feet in the row. Prune more or less every year to get rid of the old wood and keep the bushes open. Currant worms should be vigilantly looked for in the spring and summer. These worms can be destroyed by white helebore one ounce in three gallons of water, and apply with a sprinkling can. Be sure and use the remedy as soon as or before the worms appear. The currant is well adapted to our soil and climate, and everyone should have a liberal supply. Plant some of them. They are profitable.

Pric	ce of Two	Year Old	Plants	
		Each	Doz.	100
Perfection		\$0.20	\$2.00	\$12.0
All Others		10	1.00	5.0

Champion—A variety from England now well tested in this country and pronounced everywhere to be the best black currant yet introduced. Very productive, large bunch and berry, excellent quality, strong, vigorous grower

Cherry—Fruit of the largest size, deep red, rather acid; short bunches; growth strong, stout and erect, short-jointed shoots.

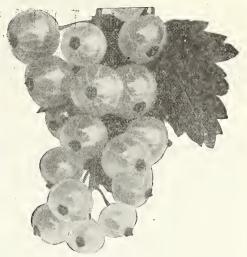

Fay's Prolific—The leading market variety. Extra large stems and berries, uniform in size, easily picked, exceedingly productive.' No variety ever made as quick a jump into popular favor, the demand most seasons being in excess of the supply.

London Market—A particularly variable variety for northern climates as it is planted extensively in Michigan and is regarded as one of the very best for that state. The plant is extremely hardy and vigorous and retains its foliage throughout the season. Beautiful in color, large in size and a very heavy cropper. Ships well and is excellent for market either near or distant.

Perfection Currant—The latest introduction created by crossing Fay's Prolific with White Grape and combines the best qualities of both parents. In color it is a beautiful bright red and of a size larger than the Fay; the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive currants we have ever known and in quality it is superior to anything in the market today, being of a rich, mild, sub-acid flavor and having plenty of pulp with a few seeds. It was awarded the Barry

the second of th

Medal of the Western New York Horticultural Society in 1901, and the

White Grape

Pan-American Medal the same year—the highest award given any new fruit.

Red Dutch—An old variety excellent and well known as the standby variety.

Versailles—Very large; red; bunch long; of great beauty and excellent quality. One of the finest and best large sorts.

White Grape—Very large; yellowish-white; sweet or very mild acid; excellent quality and valuable for the table. The finest of the white sorts. Very Productive.

Wilder—Clusters above medium length and berries large, bright red, of excellent quality, with mild, sub-acid flavor; ripens early and is a good keeper.

GOOSEBERRIES

As to the soil, cultivation, etc., all we have said concerning the currant applies to the gooseberry. Who, that is acquainted with its different uses and knows the delights of a gooseberry pie, would ever again willingly be without this most healthful of all fruits? Plants are two years old.

Price of G oseberries

	Each	Doz.	100
Downing	\$0.15	\$1.50	\$ 8.00

Industry	.20	2.00	15.00
Pearl	.15	1.50	10.00
Smith's Improved	.15	1.50	10.00

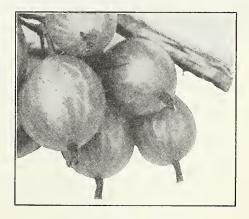

Downing—Originated at Newburg, N. Y. Fruit much larger than Houghton; roundish, light green, with distinct veins; skin smooth; flesh soft, juicy and very fine flavored.

Houghton—A vigorous American sort; very productive, free from mildew. Fruit medium, roundish, smooth, of a pale red color; tender, sweet and of a delicious flavor; very profitable for canning and catsup.

Industry—Very large, red; of fine quality and excellent flavor. New and very desirable if kept free from mildew, as it is the largest grown.

Smith's Improved—Large, oval, light green, with bloom; flesh moderately firm, sweet and fruitful in habit.

Pearl—Similar to Downing, but with fruits a little larger; it is also even more robust and good; vigorous grower.

Downing Gooseberry

NUT TREES

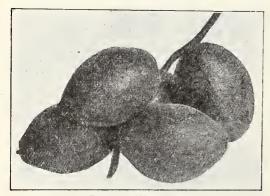

The culture of nuts has been entirely neglected in this country. To meet the demand for nuts they have been imported, which is unnecessary for they can be produced here as well as in other countries. The market for nuts is sure and profits large. Aside from the value of the nuts, the timber of some varieties, as walnuts and hickories, is very valuable and becoming more so each year.

Price of Nut Trees

Almond, Hardshell—A fine, hardy variety with a large, plump, sweet kernel; tree very showy and ornamental in blossom. The hull cracks when ripe, permitting the nut to drop out.

Almond, Soft or Paper Shell—This is more desirable than the hard shell, wherever it will succeed, but is not quite as hardy. Kernel large, sweet and rich.

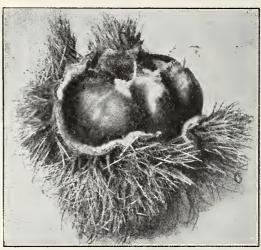

English Walnuts

Butternut, or White Walnut—A fine native tree, producing a large, longish nut, which is prized for its sweet, oily, nutritious kernel.

Chestnut, Spanish—A handsome, round-headed tree, producing abundantly very large nuts that find a ready market at good prices. Not as sweet as the American and tree not quite as hardy.

Chestnut, American Sweet—A valuable native tree, both useful and ornamental; timber is very durable and posseses a fine grain for oil finish. Nuts sweet, of delicate flavor and

American Sweet Chestnut

are a valuable article of commerce. No farm should be without its grove of nut trees, and the Chestnut should be foremost wherever the soil is adapted to its growth.

Chestnut, Japan—Very distinct from all others, dwarf grower, productive, commences bearing when two and three years old. Nuts very large and far surpassing all other kinds; of good quality.

Filbert, English—This is of easiest culture, growing 5 to 8 feet high, entirely hardy and one of the most profitable and satisfactory nuts to grow.

Hickory, Shellbark—The most valuable of the family of nuts. Nuts white and shell thinner than any other.

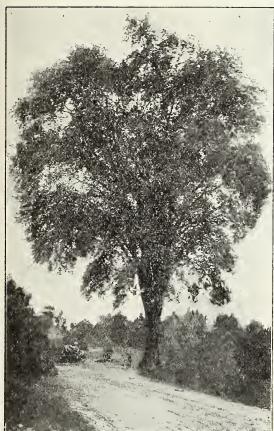

Pecan—This is a native nut belonging to the (Caraya) Hickory nut family. The tree is of tall growth and bears abundantly. The shell is very thin, the kernel sweet and delicious.

Walnut, Black—This is the most valuable of all our timber trees for planting; a rapid grower, producing a large nut. The timber enters more largely into the manufacture of furniture and cabinet ware than almost any other, and is prized almost with mahogany.

Walnut, English—A fine, lofty growing tree with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. An exceedingly handsome tree for the lawn. Perfectly safe to plant throughout the north, wherever the peach is grown.

Plant a grove of all kinds of nut trees, and in a few years receive above rewards.

Ash, American White (Fraxinus Alba)—A rapid growing tree of native origin, valuable for planting along streets or in parks; should be extensively planted for timber; adapted to a great variety of soils.

Beech, Purple Leaf—A vigorous, elegant tree, with foliage changing from deep purple in spring through crimson in summer to purplish green in fall. Hardy, long lived, free from insect pests, useful for specimens or grouping.

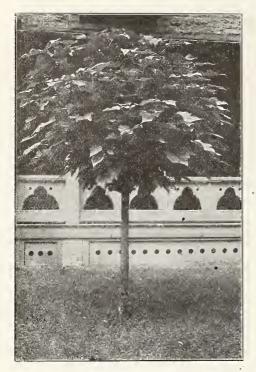

Catalpa Bungei—A remarkable species forming a dense, round umbrella-like head; makes a beautiful lawn tree when grafted or budded on a high stem.

Catalpa Speciosa—A western species growing to a large size, and with faintly mottled flowers, in large, showy clusters. The bark is rough and thick.

Elm, American White-A magnificent tree

Norway Maple

Catalpa Bungeii

growing 80 to 100 feet high, with drooping, spreading branches; one of the grandest of our native trees; makes a beautiful lawn or street tree.

Horse Chestnut—Handsome tree with showy foliage, and covered in the spring with panicles of white flowers marked with red. As a lawn or street tree it has no superior.

Linden, American or Basswood—Grows fast, forming a large, upright spreading tree. Leaves are large, and cordate, flower light yellow, delightful citron odor. Fine for the street and lawn.

Maple, Silver Leaved or Soft—A rapid growing tree of large size, irregular, rounded form; foliage bright green above and silver beneath: a favorite street and park tree.

Maple, Hard or Sugar—A well-known native tree, valuable both for the production of sugar and wood; very desirable.

Maple, Norway—A native of Europe. Its large, compact habit, broad, deep green, shining foliage, render it one of the most desirable species for streets, parks and lawns.

Maple, Schwedleri (Purple Leaved)—This beautiful tree attracts attention at all seasons, in the spring the leaves are gleaming red and purple which contrasts brightly with the delicate green of other trees. In midsummer they are purplish green and in Autumn golden yellow.

Maple, Japanese—Probably the most beautiful and graceful dwarf tree in cultivation. Very dainty but hardy. They do best in partially shaded places. Plant in rich, mellow soil

where the soil will keep moist but well drained and you will have a beauty spot in that corner. We have a fine lot of these little trees which we secured from Holland.

Mountain Ash, European (Sorbus)—A fine, hardy tree; head dense and regular, covered from July till winter with large clusters of scarlet berries.

Oak, Red—A large tree, unusually large in leaf and quick in growth, the young shoots and leaf stems are red, the foliage purplish crimson in autumn. A most beautiful, majestic object on the lawn.

Poplar, Carolina—Pyramidal in form and vigorous in growth; leaves large, glossy, pale to deep green; valuable for street planting on account of its rapid growth.

Poplar, Lombardy—Of obelisk form, growing rapidly to extravagant heights. Forms striking lawn groups; always making a striking feature in any landscape.

Sycamore, European—As an ornamental tree for large grounds, or as a shade tree for street planting, this has no superior. It is a rapid grower, attains a large size and presents a striking combination of majesty and gracefulness. The foliage is heavy and not subject to the ravages of insects.

Lombard Poplar

Tulip Tree—One of the grandest of our native trees. Of tall, pyramidal habit, with broad, glossy fiddle-shaped leaves, and beautiful tulip-like flowers.

MAGNOLIAS

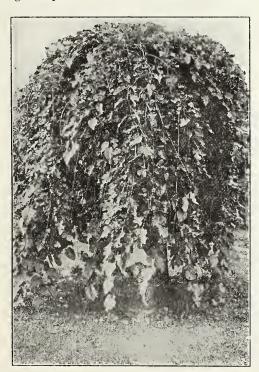

We have imported a very fine collection of the flowering Magnolias; the very choicest of the large flowering kinds. Every one is a specimen tree fun of buds, and will bloom the first spring. They do well almost anywhere and are becoming more popular each season. You should have from one to six of these in your yard.

Alexander's Magnolia S.—Closely resembles M. Soulangeana in color of flowers, but a few days earlier.

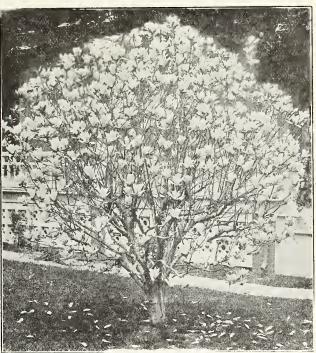

Halleana Magnolia S.—A pretty dwarf form that opens its snowy, semi-double flowers in April, earlier than any other Magnolia; their fragrance is pronounced and delicate. Rare, perfectly hardy.

Lenne's Hybria S.—A variety of great beauty. The large flowers are of deep rose color, the foliage tropical and heavy, the tree vigorous and profuse blooming, frequently opening flowers at intervals through summer.

Soulangeana's Magnolia S.—One of the hardiest and finest of foreign Magnolias, resembling Conspicua in flower and habit. Its flow-

ers are from 3 to 5 inches across, cup-shaped, white and rosy violet, opening a little later

WEEPING DECIDUOUS TREES

Prices of Weeping Trees

Birch, Cutleaf Weeping, 6 to 8 ft _____\$1.00
Elm, Camperdown Weeping, 6 to 8 ft _____ 1.00
Mulberry, Teas Weeping, 6 to 8 tt _____ 1.00
Willow, (Babylonica) Weeping, 6 to 8 ft _____ 5.0

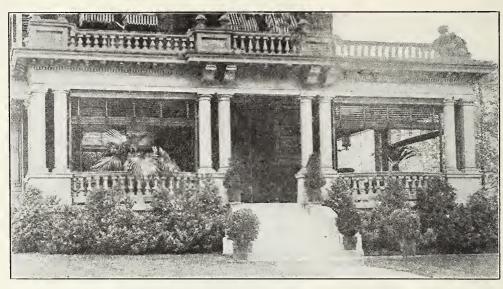

Birch, Cutleaf Weeping—Undoubtedly one of the most popular of all weeping or pendulous trees; tall and slender, graceful drooping branches, silvery-white bark, delicately cut foliage; makes an attractive specimen; growth vigorous.

Elm, Camperdown Weeping—Its vigorous irregular branches, which have a uniform weeping habit, overlap so regularly that a compact, roof-like head is formed. Leaves are large, glossy, dark green. A strong, vigorous grower. The finest Weeping Elm and one of the best weeping trees.

Mulberry, Tea's Weeping Russian—One of the finest and most graceful weeping trees, forming an umbrella-shaped head, with slender, willowy branches drooping to the ground. Foliage is beautiful, leaves distinctly lobed. Tree perfectly hardy, enduring the severe cold of the North, and extreme heat of the South. Very desirable.

Willow, Common Weeping (Babylonica)—A beautiful, graceful, well-known tree, very fine for planting by streams and ponds.

Arborvitae, American—A beautiful native tree commonly known as the White Cedar; valuable for screens and hedges.

Arborvitae, Hovey's Golden—Is a distinct, compact, hardy American seedling; dense and conical, with light green foliage.

Arborvitae Compacta—Dwarf, dense habit; grows 3 to 4 feet high; one of the best for cemeteries; excellent for hedges.

Arborvitae Globosa—Forms a natural evergreen globe or ball without any urimming; very pretty and hardy.

Balsam Fir—A very erect, regular, pyramidal tree with dull, dark green foliage, rapid growth and very hardy.

Boxwood-Most extensively used evergreen

shrub for edging indoor porch or lawn decorations. Our stock is of fine quality, fresh import.

Juniper, Irish—Very erect and tapering in its growth, forming a column of deep green foliage; a pretty little tree or shrub, and for its beauty and hardihood is a general favorite.

Blue Spruce

Spruce, Colorado Blue—A magnificent tree, with a silvery blue sheen that makes it a striking object in any landscape. Hardy in any exposure, of vigorous growth and elegant habit, with broad, plumy branches, often regularly set in whorls.

Spruce, Koster's Bue—The very best of the Blue Spruces. Foliage is silvery blue, densely crowded on the many branches. We have paid particular attention to getting the absolutely true stock of this famous tree and can guarantee its true blue color and character.

Spruce, White—One of the very best confers, especially for cold climates. Compact, upright-growing, long-lived, retaining its branches to the ground; aromatic, drought-resisting; varies in color from light green to glaucous blue.

Spruce, Norway—Rapid in growth, gracefully drooping habit, dense in structure, regular in outline and perfectly hardy.

Tom Thumb—A very small, compact evergreen with very fine foliage. Makes a beautiful ornament for a small yard or cemetery lot; fine for low hedges.

Globe Headed Arborvitae

SHRUBS

What a wealth of pleasure there is to be had by the artistic planting of Ornamental Shrubbery! Unattractive homes may be made beautiful, objectionable views hidden, barren sites made interesting and flowers to bloom throughout the summer by a judicious selection of varieties and a careful arrangement of shrubbery grouping.

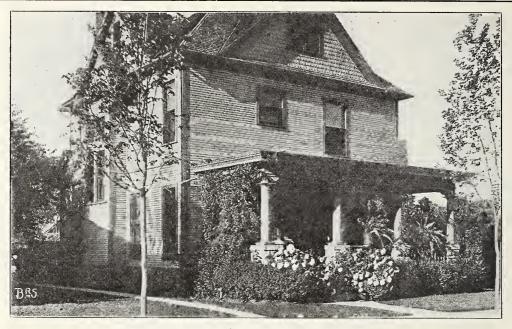

We have photographed a number of pleasing home plantings which we are showing in this catalogue in place of the usual single plant illustrations, which we hope will be an inspiration to some and give all some ideas of the cost for different combinations of trees, shrubs and plants. If any of these collections suit your fancy you can order by collection number, and we will know just what you want. Note the Big Bargains we offer you in these collections.

PLEASE DO NOT ASK US TO MAKE CHANGES ON THESE SPECIALS.

COLLECTION A-12 August Lillies (edge of house), 1 Magnolia, 1 Rose of Sharon (any color), 1 Double Flowered Deutzia, 1 Weigela Candida, 1 Spirea Van Houtte, 1 Apple Tree, 6 Grape Vines, 6 Hollyhocks, 12 Assorted Dahlias, 6 Yucca (for Border) Our Regular Price \$6.95.

\$5.75

A SPLENDID MODERATE PRICED PLANTING

COLLECTION B—2 Soft Maple, 2 Clamatis (purple and white), 6 Japanese Barberry (on left), 6 Hydrangea (on Left and Right), 12 Barberry (on Right), 1 Climbing Rose (on corner), 2 Feran (on Rail), 12 Lilac (Screen), 12 Sprea Anthony (Clump on each Entrance), 12 Myrtle (end of house), Cherry Tree (Left of Walk), Orchard (back side), Our Regular Price \$14.15.

ALTHEA—ROSE OF SHARON

The Altheas are both serviceable and showy. They are free growing, flowering shrubs, of very easy cultivation, blooming late in August and September, with a profusion of large and brightly colored flowers, makes them the handsomest and most desirable flowering tree on the market. Entirely free from all insect pests, and always give the best satisfaction. Require pruning each spring. Tender in some localities.

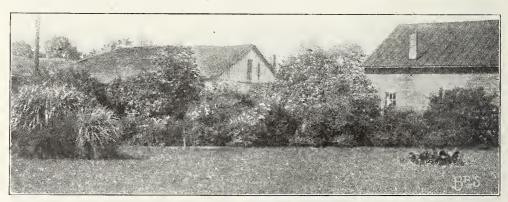

All Colors, Red, White, Pink and variegated —25c each; \$2.50 per doz., for hedging, \$10.09 per 100. Makes a very beautiful hedge.

ABELIA

Abelia A. Grandiflora—In the South this is classed as a broad-leaf evergreen, but in this section it drops its foliage late in the winter. It is one of the handsomest shrubs, 2 to 3 feet in height, with arching stems clothed with glossy, dark green leaves and bearing a great profusion of small, tubular flowers, white tinged with pink, from early summer until frost. 50c each; \$5.00 per doz.

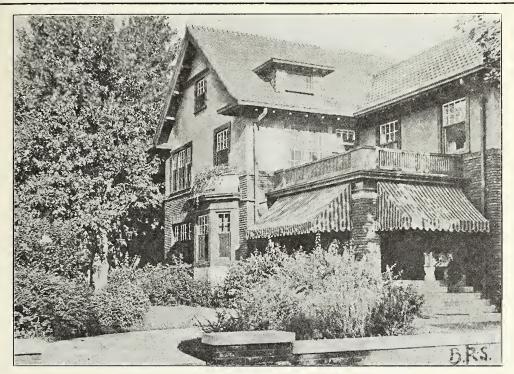

PYRUS—FLOWERING CRAB

P. Augustifolia, var Bechteli (Bechtel's Flowering Crab, 20) A low, bushy tree, the most beautiful of all the fine varieties of Flow-

YOU CAN COVER UP UNSIGHTLY PLACES WITH SHRUBS

PROPER PLANTING ENRICHES THE FINEST HOMES

ering Crabs. At a distance the tree seems to be covered with dainty little roses of a delicate pink color. Blooms when quite young. Is very fragrant. 3 to 4 feet, 60 cents each.

BARBERRY

Var. Purpurea (Purple Barberry)—A showy and effective shrub similar to B. Vulgaris in habit, but with fine purple leaves that contrast beautifully with its flowers and with other shrubs. 25 cents each; \$2.50 per doz; \$12.00 per 100.

B. Thunbergi (Thunberg's Barberry)—Inimitably neat and dense in growth, quite graceful because of its drooping branches. The yellow flowers are followed by scarlet fruits borne in dense profusion on the long stems and clinging through most of the winter; the leaves color to scarlet and gold in autumn. 25c each; \$2.50 per doz; \$12.00 per 100.

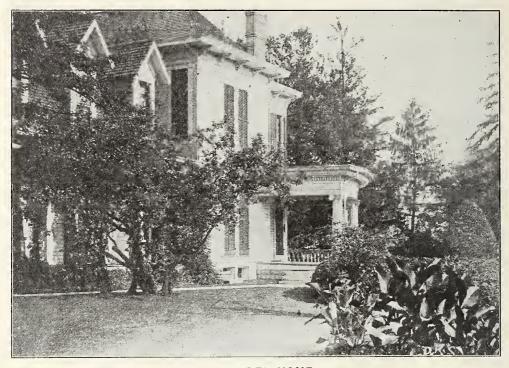

B. Vulgaris (European Barberry)—A handsome shrub with yellow flowers in May or June, followed with orange scarlet fruit. 25c each; \$2.00 per doz.; \$12.00 per 100.

CALYCANTHUS

Carolina Allsprice; Sweet Shrub (C. Floridus)—Commonly called Sweet Scented Shrub. Flowers purple, very double and deliciously fragrant, foliage rich dark green, blooms in June and at intervals afterwards. Very desirable. 25c each; \$2.00 per doz.

Calycanthus

A MODEL HOME

COLLECTION D—6 Cannas Alfonse Bouvier (in center), 12 Cannas Florence Vaughan (for edging), 33 Spirea Van Houtte (hedge 100 ft.), 2 Arborvitae American, 5 White Pine, 1 Golden Elder (at corner of porch), 3 Clematis (all colors over windows), 1 Wistaria Chinese Purple (on Trellis over walk), 3 Lilac, Syringa (any color), 12 Myrtle (between Clematis). Our Regular Price \$16.00. Collection D. Special Price. \$12.50

CERCIS—RED BUD; JUDAS TREE

C. Canadensis—The hardiest and, perhaps, the finest species of a handsome group of early and profuse flowering trees. Medium height, forming a broad, irregular head of glossy, heart-shaped leaves that color pure yellow in fall. It blooms in earliest spring, with the Dogwoods and Magnolias, and is valuable for grouping with them. Masses of small, delicate rosy purple flowers wreath the leafless branches. Must be transplanted when small. 25c each; \$2.50 per doz.

CHIONANTHUS-FRINGE TREE

C. Virginica (White Fringe Tree)—One of the handsomest wild shrubs, growing to tree-like proportions. Its loose, gracefully drooping panicles of white flowers appearing in May and June are quite fragrant, and borne in fringing clusters above very large, deep green leaves of thick, leathery texture, turning yellow in fall. These are followed by small, blue, plum-like fruits. 35c each; \$3.50 per doz.

CLETHRA

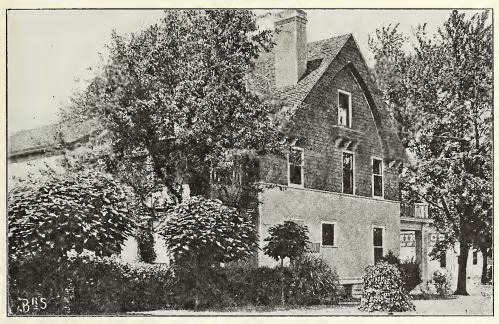

C. Alnifolia (Sweet Pepper Bush)—A handsome little shrub, delightfully fragrant in September, when covered with long, showy wands of white flowers. Its beautiful flowers make a splendid show in a border at a time when white flowers are becoming scarce. 25c each; 5 for 1.00.

DOGWOOD—CORNUS

- C. Sanguinea, var.—Grow 8 to 10 feet high, with purplish red branches and leaves handsomely marked with white. The flowers which appear in May and June are greenishwhite, in flat-topped clusters, followed by black berries.
- C. Sibirica (Siberian Dogwood)—Free-growing, 6 to 10 feet tall, and very hardy; forms a small, handsome tree in some situations. Clusters of small, white flowers in early summer are very dainty and its bark is a showy, dark red in spring. All the Siberian Dogwoods bear in early fall a profusion of whitish blue berries, making them distinctly ornamental after the flowers are gone. 25c each; 5 for \$1.00.

CYDONIA—JAPAN QUINCE

C. Japonica—Very early in spring this fine old shrub is completely covered with dazzling, scarlet flowers. The leaves are deep green and glossy, the growth tall, bushy, twiggy, with stout branches armed with fierce thorns. The quince-shaped fruits are quite fragrant. It makes a beautiful flowering and defensive hedge; grows naturally 3 to 6 feet high, but bears any amount of shearing. 20c each; 6 for \$1.00.

THE CATALPA AND HEDGE HARMONIZE

COLLECTION F—3 Bungel Catalpa; 1 Teas Weeping Mulberry; 33 Spiera Van Houtte; 12 Hardy Everblooming Roses; 12 Hardy Hydrangea; 5 Magnolias; 1 Soft Maple; 1 Blue Spruce; 1 Climbing Rose. Orchard—12 Apples; 3 Pear; 3 Cherry; 12 Peach; 3 Plum; 6 Grape; 25 Blackberry; 25 Raspberry; 100 Strawberry; 100 Asparagus; 6 Rhubarb; 6 Gooseberry; 6 Currant; 6 Sage. Our regular price \$39.85. Collection F. Special Price \$39.85.

DEUTZIA

Deutzia Candidissima—The pure white double flowers in erect panicles 2 to 4 inches long are so perfect in shape that they are frequently used as cut-flowers. The bush is neat and shapely, growing 6 to 8 feet high, and is a handsome addition to any planting. 25c each; 5 for \$1.00.

- D. Flora Pl.—A double form of the type. Handsome and effective. The white flowers are delicately flushed with pink. 25c each; \$2.50 per doz.
- D. Gracilis (Slender Branched Deutzia)—A neat, dense little bush, rarely over 2 feet high, that blooms in May, wreathing its drooping branches with pure white flowers. Equally valuable for shrubberies and forcing. 25c each; \$2.50 per doz.
- D. Pride of Rochester—Produces large double white flowers, tinged with rose; vigorous grower, profuse bloomer and one of the earliest to bloom. 25c each; \$2.50 per doz.
- D. Lemoine—Flowers pure white; shrub dwarf and free flowering; excellent for forcing. 25c each; \$2.50 per doz.

FORSYTHIA—GOLDEN BELL

Weeping Forsythia (F. Suspensa)—Resembles the Fortune in its flowers, but the growth is somewhat drooping. Flowers are a beautiful bright yellow and appear before the leaves. One of the best and earliest of the early flowering shrubs. 25c each; \$2.00 per doz.

F. Viridissima—The flowers of this variety are a little deeper yellow than in other sorts, and are sometimes twisted. The bush is not

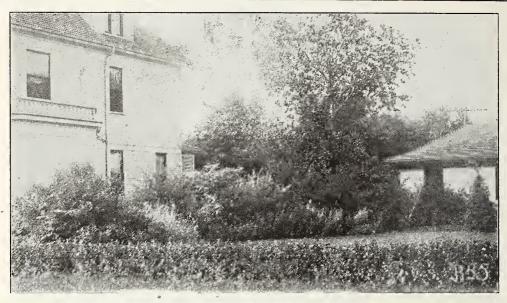

quite so hardy as the others of the species. 25c each; \$2.50 per doz.

HYDRANGEA

H. Paniculata Grandiflora—Familar to almost every one as the most conspicuous shrub in any collection during August and Septem-

Hydrangea

BACK YARDS CAN BE MOST ATTRACTIVE.

COLLECTION U—300 California Privet Hedge, 1 Norway Spruce, 1 Blue Spruce, 4 American Arborvitae, 4 Hovey's Golden Arborvitae, 2 Althea or Rose of Sharon, 2 Spirea Van Houtte, 1 Golden Elder, 1 Fringe or Smoke Tree (Purple), 3 Lilac (assorted colors), 6 Yucca Filamentosa or Adam's Needle, 2 Ornamental Grass, 1 Cut-leaved \$45.65 Collection U. Special Price. \$45.65. Collection U. Special Price ..

Its massive plumes of white ber. Its massive plumes of white flowers bend the branches with their weight, changing finally to pink and bronzy green. Of these we have one of the finest lot, that surely will please even the most critical buyer. Bush 25c each, \$2.50 per doz; \$15.00 per 100. They make a beautiful fence. Tree from 3 to 4 feet, 50c each; \$5.00 per doz.

H. Arborescens Grandiflora-A grand addition to the summer flowering shrubs: dwarfing the show of other sorts in July and August by the magnitude and profusion of its flower-heads. The flowers are in a large way similar to the familiar "Snowball" in appearance and are so conspicuously white and imposing that whether as single specimens, as cut-flowers or in groupings, their presence is predominant. 35c each; 3 for \$1.00

HYPERICUM—ST. JOHN'S WORT

- H. Moserianum (Gold Flower)—A showy, half-pendulous shrub, glossy, bright vellow flowers; are two or more inches in diameter and tufted with masses of yellow stamens, blooming in midsummer. May be grown in shaded places where few other plants will thrive. 25c each; 5 for \$1.00.
- Calycinum (Aaron's Beard)—A low spreading shrub, very useful for ground-covering, the dark green, leathery foliage being ever green in the South. In the North it turns brown. Bright yellow flowers 2 to 3 inches wide. 25c each; 5 for \$1.00.

HONEYSUCKLE—LONICERA

L. var. Alba—A beautiful, tall bush with creamy white flowers in May and June, 25c each; \$2.50 per doz.

L. Tartarica (Tartarian Honeysuckle)-The beautiful pink flowers contrast beautifully with its bright green foliage, its chief charm is the wealth of orange or red berries which literally cover the plant in summer and autumn, 25c each; \$2.50 per doz.

MAHONIA

Aquifolia (Holly-leaved Mahonia)—Handsome native evergreen of medium size with shining, prickly leaves and showy, bright yellow flowers in May, followed by bluish berries. Quite useful in decorative planting for its neat habit and fine bronze-green leaves. 35c each; \$3.00 per doz.

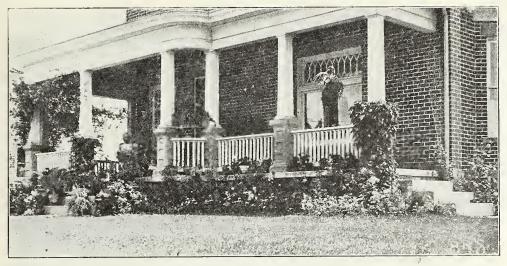

Philadelphus (Mock Orange)-The Mock Orange is undoubtedly one of the best known and most popular shrubs, and, in spite of the great numbers of new plants which have been introduced, the old Philadelphus holds own more freely than ever. The flowers are very sweet-scented, milk-white, in most cases and beautiful for cutting. 25c each; \$2.50 per

PRUNUS—FLOWERING PLUMS

P. Triloba Fl. Pl. (Double-flowering Plum) -A charming shrub or small tree, 3 to 5 ft. high, of spreading, vigorous growth. Very early in spring before its leaves appear the whole tree is decked in a fleecy cloud of very double light pink blossoms. 25c each; 5 for \$1.

RHODOTYPUS

R. Kerrioides (White Kerria)—An attractive shrub of medium growth, 3 to 6 feet high, with good foliage and large, single white flowers late in May. The black seeds which follow are odd and showy. 25c each; 5 for \$1.

PERPETUAL SATISFACTION

COLLECTION G-2 Climbing Roses (pink and white); 10 Spirea Anthony; 10 Hydrangea; 2 Ferns; 1 Purple Clematis; 12 Hardy Phlox; 12 Everblooming Roses. Orchard-12 Grape; 4 Cherry 16.45
4 Peach; 2 Pear; 2 Apple; 4 Norway Maple; 8 Rose of Sharon; 2 Boxwood. Special

RHUS

R. Cotinus (Purple Fringe Tree or Smoke Tree)—An unique and conspicuous spreading shrub or small tree 10 to 12 feet high, with large leaves. These are overhung in midsummer by cloudlike masses of pale, misty flowers, having the appearance of smoke at a little distance. Foliage changes to brilliant yellow and red. 25c each; \$2.50 per doz.

RIBES—FLOWERING CURRANT

R. Aureum (Golden Currant)—Fragrant yellow flowers in clusters in early spring followed by dark brown fruits. Prized very highly. 35c each: 3 for \$1.00

ROSA RUGOSA

A Japanese introduction which is very ornamental. The foliage is especially beautiful, being of deep vigorous green color; very healthy and of peculiar deeply ribbed appearance. The flowers are large, single, and of exquisite beauty, followed by large crimson berries which remain until early spring. We have both white and pink sorts. Very valuable for hedges. 25c each; 5 for \$1.00.

RHODODENDRONS

These are imported Holland grown Rhododendrons. They are broad leaved evergreens and will stand our winters admirably if protected from direct rays of the sun while frozen. The freezing does not seem to hurt them, it is the thawing out in the sun that is to be avoided. The best place for Rhododendrons is on the north side of the house where they will not get the sun. The plants we have, have from 12 to 18 buds on them (the buds of Rhododendron flowers from the previous season, and they will bloom for you this spring. Not only are the blossoms beautiful but the leaves remain a beautiful green and glossy all the year around. They are a shrub not often

seen, but they are not in the least hard to grow, and they reward you many times over with the pleasure to be had from them. A plant you will be proud of. May be planted any time up to June with perfect safety. Planted in a light, fibrous soil, and with frequent copious watering, they should thrive and bloom freely. After blooming, seed pods must be removed to insure flowers the next year. We have all colors, red, white and pink. Price \$1.50 each; about 2 feet high.

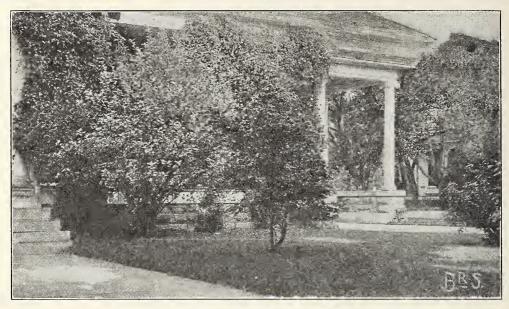

SAMBUSCUS—ELDER

S. Uigra, var. Aurea (Golden Elder)—A handsome variety with golden-yellow foliage. Contrasts beautifully with other shrubs. 25c each; \$2.50 per doz.

SPIREA

Spirea Billardi—A narrow, dense shrub 6 feet high, with dense panicles of rich pink flowers in July and August, also in fall. 25c each; \$2.50 per doz.

- S. Bumalda—A spreading, low bush, but 2 feet high, with dark leaves brightened by corymbs of light pink flowers in May and at intervals all summer. 25c each; \$2.50 per doz.
- S. Anthony Waterer—A fine dwarf Spirea with dark crimson flowers. Perfectly hardy; makes a fine, compact plant. 25c each; \$2.50 per doz.
- S. Fortunei—Compact upright growth, 4 ft. high, with bluish green foliage, and an all summer's profusion of flat clusters; bright rose. 25c each; \$2.50 per doz.
- S. Prunifolia (Bridal Wreath)—Among the earliest of the double Spireas to bloom and very showy at that early time. The branches covered with small double white flowers, gives a plume-like effect. Grows 5 to 7 feet tall, but will stand pruning to any height. 25c each; \$2.50 per doz.

THE JAPANESE MAPLE IN THE FOREGROUND

COLLECTION H—2 Climbing Roses (red and white; 3 Magnolia (red, rose white purple); 3 Japanese Maple (red leaf); 1 Purple Spirea or Spirea Van Houtte; 2 Purple Barberry; 2 Althea or Rose of Sharon; 12 Everblooming Roses; 6 Cherry (assorted). Orchard—12 Apple; 12 Peach; 3 Pear; 6 Grape (assorted); 100 Strawberry; 12 Blackberry; 12 Raspberry; 6 Rhubarb; \$40.00 Hovey's Golden Arborvitae Hedge; 2 Boxwood.\$49.10 value. Special Price

S. Van Houtte—This is one of the finest ornamental shrubs in our whole collection and much used for hedges. Foliage a rich green, changing to beautiful tints in the fall; in blooming season the bush is a perfect mass of pure white flowers, the branches bending to ground. 25c each; \$2.50 per doz.; \$10 per 100.

SYRINGA--LILAC

S. Persica (Persian Lilac)—A fine old species with slender branches and narrow leaves; it seldom grows more than a few feet high. Its flowers are very fragrant and borne in large, loose panicles in late spring. Very graceful. Colors, red, white, purple. 35c each; 3 for \$1.

SYMPHORICARPOS

- S. Racemosus (Snowberry)—Flowers inconspicuous, rose-colored, in June and July; leaves thin, dark green; fruits large, milk-white. 25c each; \$2.50 per doz.
- S. Vulgaris (Coral Berry, Indian Currant)—Like the Snowberry, except that its fruits are red, and that the red berries cluster along the stems, which droop beneath their weight. 25c each; \$2.50 per doz.

TAMARIK—TAMARISK

- T. Africana—Bright pink flowers in slender raceness in April and May. Shrub is 15 feet tall, with reddish bark. 25c each.
- T. Odessana—Gracefully bending, silver green foliage; with loose racemes of pink flowers; latest in bloom. 25c each.

VIBURNUM—ARROWOOD

V. Opulus (High Bush Cranberry)-A very

decorative native shrub, with white flowers in May, followed by beautiful, showy clusters of scarlet fruits. 25c each; \$2.50 per doz.

- V. Sterile (Snowball)—Well known common snowball; even more showy than the new type, great clusters of white flowers. 25c each; \$2.50 per doz.
- V. Plicatum (Japan Snowball)—Of better habit than the familiar older form, with handsome plicate leaves and more delicately formed, whiter flowers in clusters, red fruit, 35c each; \$3.00 per doz.

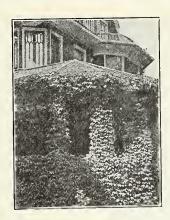

WEIGELA

- W. Abel Carriere—This is perhaps one of the finest tall shrubs. Bears great quantities of rose-carmine flowers with yellow spot in the throat. Blooms in May and June. 25c each; \$2.50 per doz.
- W. Chameelon—Rose-colored flowers borne in great abundance in early spring in time for Memorial Day use. 25c each; \$2.50 per doz.
- W. Candida—An extra choice and vigorous sort, that yields one profuse crop of flowers in June, and lighter ones at intervals all summer. 25c each; \$2.50 per doz.
- W. Rosa Nana Variegata—Of neat, dwarf habit, with pink flowers and leaves broadly margined with creamy white. 25c each; \$2.50 per doz.
- W. Eva (Rathke)—Flowers of dark carminered. Distinct and fine, one of the best hybrid varieties. 25c each, \$2.50 per doz.

Shrubs vary in size as to habit of growth. If special large specimens wanted, write, and will make price.

Boston Ivy

Wistaria

Hardy Ornamental Climbing Vines

Ampeiopsis Veitchii (Boston Ivy)—Forms a dense sheet of green as leaves overlap each other, is a little difficult to start, but once established requires no further care; foliage changes to a crimson scarlet in the fall, very valuable for covering brick or stone structures. 25c each; \$2.50 per doz.

Chinese Matrimony Vine (Lycium Sinensis) A creeping or trailing vine; foliage a grayish-green; flowers appear in June and continue blooming until September; color varies from pink to purple; fruits are a bright crimson and make a beautiful contrast with the green foliage; valuable for trellises and fences. 25c each; 5 for \$1.00.

Aristolochia (Dutchman's Pipe)—A native species of climbing habit and rapid growth, light green foliage, and pipe-shaped yellowish-brown flowers. 50c each; 6 for \$2.50

Honeysuckle-Halliana (Hall's Japan Honeysuckle)—Pure white and creamy yellow, very fragrant flowers; in bloom the whole season. Almost evergreen. A very valuable climber. 25c each; 5 for \$1.00.

Wistaria Chinese Purple—Flowers are borne in dense drooping clusters of a pale blue color; vine vigorous, hardy and a rapid grower. 25c each; 5 for \$1.00.

CLEMATIS—LARGE FLOWERING

A beautiful class of hardy climbers; many of the varieties have flowers 5 and 6 inches in diameter. They are very valuable for training around and over pillars, verandas, fences, rock work and etc. 2 years old, very fine, strong, well rooted vines.

Jackmani—Immense flowers of an intense violet-purple color, bloom continually all summer. 35c each; 3 for \$1.00

Henryi—Flowers creamy-white and very large. A free bloomer, 35c each; 3 for \$1.00.

Madam Edouard Andre—Plant a strong vigorous grower, and very free in bloom. Color a distinct crimson-red. Entirely distinct from all other varieties. 35c each; 3 for \$1.00.

Ramona—A vigorous grower and perpetual bloomer; flowers a deep rich lavender. 35c each; 3 for \$1.00.

Paniculata—Probably the most popular of the small flowering sorts; vine is a rapid grower with glossy, green foliage; in Sept. the flowers appear a mass of white giving the appearance of a bank of snow; the fragrance is most delicious and penetrating. 25c each; 5 for \$1.00.

Suggestion—The following are very desirable for ornamental hedging to beautify lawns and driveways, description of which you will find in this catalogue: Altheas, Barberrys, Hydrangeas, Paniculata, Roses, Spireas, Tartarian Honeysuckles and Privet.

Hedge Plants

California Privet—A pretty shrub with smooth, shining leaves. A vigorous, hardy plant, the best there is for low hedges. Fine close growing habit. Make a beautiful ornamental hedge. 1-year-old, 5 cents each; \$3.00 per 100; \$25.00 per 1,000. 2-year-old, 8 cents each; \$5.00 per 100; \$40.00 per 1,000.

Osage Orange-A native tree of medium

size and spreading habit; leaves bright, shiping green, broad and sharp pointed; the fruit resembles an orange in size and color. 60 cents per 100; \$5.00 per 1,000.

.There are many of the flowering shrubs and some of the Evergreens which are suitable for hedges. We shall be glad to advise with you in the selection of plants for hedging.

Special Novelties

PONDEROSA LEMON

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is a true ever-blooming variety. On a plant six feet high no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight. The tree was blooming and at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit showing it to be a true everbbearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not incommon to make twelve lemon pies from one lemon. Small plants 25c each; large plants 15 to 18 in., 50c each.

OTAHEITE ORANGE

As a pot plant this lovely Dwarf Orange is one of the most novel and beautiful that can be grown. With a couple of plants of it you can have an abundance of the farfamed orange blossoms, and we recommend it to our friends as a novelty of sterling worth and merit. Small plants 25c each; large size 15 inches, 50c each.

How to Get these Novelties Free

All orders for Nursery Stock received by March 15th, amounting to \$5.00 or over we will give free, if claimed with order, one Lemon or Orange plant; on an order of \$10.00 or over we will give free one of each, if claimed with order.

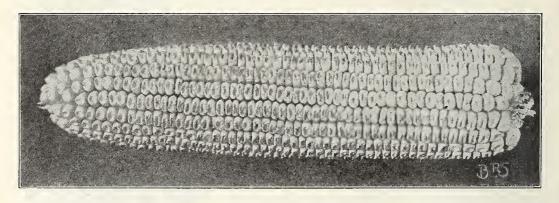

Club Offer

We have made this offer a number of years and it pleased many, so we extend the same offer this year and hope many new customers will take part. We offer you 10 per cent discount off catalogue prices in cash or in nursery stock, for all the orders you can secure for us among your friends and neighbors at our low prices for good stock. You will have no trouble in securing an order from each of your neighbors when you have spare time and of evenings. Take this catalogue, show it to them, and see how easy it is. Collect for same and when you get through keep 10 per cent for your trouble and send us balance. If you need more order blanks or catalogues write for them and same will be forwarded by first mail. Will you not try and see how many you can get? Each order is nicely labeled and tagged and no trouble to find each man's order when the stock reaches you. To ship in one box or bale it saves much in freight and express.

Copy of certificate of State Inspection is attached to all shipments. All stock is fumigated also for states where it is required, and when requested.

Seed Corn

Our seed corn is all carefully selected, from the largest yielding crops of high-bred, true to type. What we offer is carefully sorted and gathered by hand, tipped and nubbed, shelled and graded. Properly cured and dried to get the highest germinating power. We guarantee our seed corn to please, if not, money will be refunded, on its return should it not be as represented, when received. We are careful that our customers get the best only—good seet corn is cheap at any price; order early and have it on hand when time to plant.

Jones' Prolific Corn—Grows from three to nine ears on a stalk. We think this is the best silo corn that can be grown. For meal or hominy, it is unsurpassed. Don't fail to order at once and avoid delay or disappointment. Last spring we were unable to fill all our orders for this corn and we anticipate the same experience this spring, so order early while we have a good supply. Quart, 25c. If by mail, 30c; peck, \$1.50; bushel, \$5.00.

Reid's Yellow Dent—A medium early, yellow variety producing well-filled ears of good length and filling out remarkably well even under adverse conditions. The grains are deep, narrow, slightly dented, small cob, and an extremely fine early variety for feeding, and produces a large crop. We especially recommend this, and our stock is particularly fine quality. Peck 75c; bushel \$2.50.

Learning—Old distinct and reliable standby; rich, golden yellow, very uniform ear, and one of the best for fattening hogs or cattle and fill your crib each season and should be planted for a sure crop. Peck 75c; bushel \$2.50.

Johnson Co. White Dent-White, which will outyield any other variety and won the grand prize at the National Corn Show at Columbus, 1911. Peck 75c; bushel, \$2.50.

Ninety Day Corn—This is a grand early variety which we have grown for years. It yields well and will mature in 90 days. No better variety for late planting, or replanting any yellow variety, so that it will ripen at the same time. Ears grow good size when planted in rich soil. Valuable for all purposes. We have only a limited supply on hand for this season. Peck 75c; bushel \$2.50. For corn on ear, add 25 cents extra per bushel.

SWEDISH REGENERATED OATS

Select the best white oats; the best to yield; very heavy in weight; pure white, make a good appearance, thick and plump and a strong grower which enables them to stand the drought better than most any other. 75c per bushel; 10 bushels or over, 73c per bushel. At our low prices you cannot afford to plant poor seed, but the best on the market.

Regenerated Oats

Seed Potatoes

Pure select, Red River Stock. The best seed to be had.

Early Triumph—Triumph is about a week earlier than the Ohio, round, with square ends; skin red and flesh pure white and fine. A good yielder of medium sized potatoes. Peck 50c; bushel \$1.60. Early Ohio - A

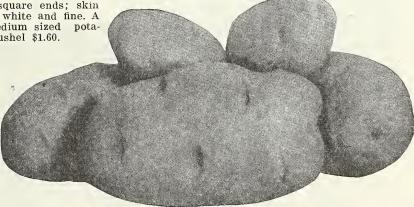

standard early potato and a good one. Does well in all soils; is very oval in early, shape, has pink and shallow eyes. A splendid keeper. Peck 40c; bushel \$1.50.

Early Rose — This old-time variety is still very popular. It is a long potato and

pink in color at the bud end. Grows to a good size, yields well and is of fine quality. Peck 40c; bushel \$1.50.

Irish Cobbler-A large potato and a heavy yielder. Tubers round and slightly flattened; flesh white and cooks dry and floury. It is very popular in this section, both for early and late planting. Peck 40c; bushel \$1.50.

White and Red Peachblow-Again we praise the Peachblow; it is such a strong grower; it stands the severe drouths so well and still

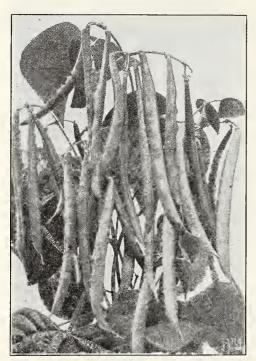

White Peachblow

produces big crops. They are great yields, and one of the best late potatoes we have ever grown. It is a good keeper and does not shrink, but in the spring is plump and solid and cooks like new potatoes. Plant in good, rich soil about June 1st to 10th, and you will be delighted at digging time. These genuine White and Red Peachblow, seed potatoes, offered only by us, order early as our stock is limited, and each year we sell out before the season is over. Many of you know this from experience so order early this time. Peck 50c; bushel \$1.75.

Staple Garden and Vegetable Seed

of the Best Varieties Only

Golden Wax

Burpee's Stringless—This variety is stringless and remains tender and crisp; matures with the earliest of green pod varieties. 20c pt; 30c qt.

Burpee's Bush Lima—A true bush form of the old large Lima Pole Bean.. It grows vigorously, yields from 50 to 100 fine pods, similar to those grown on the large White Lima Bean. 20c pt; 35c qt.

Golden Wax—One of the best strains of Golden Wax, prolific, of the best quality; pods long, straight, thick and vines very erect. 20c pt; 35c qt.

Kentucky Wonder—An old favorite, with long, fleshy, deeply saddle-backed pods. Very prolific, producing an abundance of fine, stringless, crisp beans until late in the season. 20c pt; 35c qt.

King of Garden Lima—A vigorous grower, bearing profusely. The beans are large and of rich flavor. 20c pt; 35c qt.

CUCUMBER

Early Green Cluster—A much esteemed early variety growing in clusters; is extremely productive. Pkt. 5c; 10c oz; 25c 1/4 lb.

Improved Long Green—A fine cucumber, unsurpassed in quality. Fruit long and slim. Standard sort for pickling. Pkt 5c; 10c oz; 25c 1-4 lb.

BEET

Crosby's Improved Egyptian—An improved strain of the Egyptian Beet, especially recommended as an extra early sort. It is much thicker than the original strain. Pkt. 5c; 10c oz; 30c 1-4 lb.

CABBAGE

Early Jersey Wakefield—A variety that deserves a place in every garden. Heads conical in shape, growing solid and with few outer leaves. No other cabbage bearing as large heads is as early. Pkt. 5c; 20c oz.

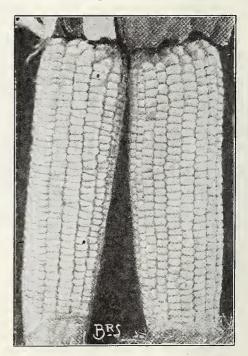

Premium Flat Dutch—Nothing else exactly fills the place of this popular variety of cabbage, which is too well known to require extended description. Pkt. 5c; 20c oz.

SWEET OR SUGAR CORN.

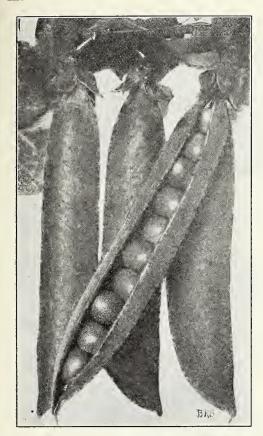

Country Gentleman—One of the richest flavored of all the late varieties. As a table corn this variety stands unrivaled and without doubt is the most luscious of all varieties of Sweet Corn. Pt. 15c; 25c qt.

Early Adams—While not a Sugar Corn, is a tender white corn for the table; can be planted earlier and will be ready in sixty days. Pt. 15c; 25c qt.

Golden Bantam—An extra early variety of vigorous growth and surpassing delicious flavor. Pt. 20c; 35c qt.

Country Gentleman

Telephone

Stowell's Evergreen—Standard variety, both for home use and market, and is the general favorite. Ears large size, grains deep, exceptionally tender and sugary. Pt. 15c; 25c qt.

CANTELOUPES OR MUSKMELONS

Tip-Top—A yellow fleshed melon of handsome appearance and excellent quality. A medium sized muskmelon, nearly round in shape, with shallow netting on skin. Flesh is deep yellow and rich flavor. Grows in all sections. Pkt. 5c; 10c oz.

Kale (Dwarf Curled Scotch)—A variety largely used for shipping. It has a finely curled leaf and has a low and spreading growth. The leaves are ornamental and are used for garnishing, as well as greens in the Fall, Winter and Spring. Pkt. 5c; 15c oz.

ONION SEED

Yellow Globe Danvers—A standard sort and one of the most desirable; an excellent keeper and very productive. Pkt. 5c · 10c oz.

Onion Sets—Yellow Danvers onion sets should be planted out as early in the spring as the ground is dry enough to work; plant them in rows 12 inches apart, with sets 2 inches apart in the row. Quart 15c; 4 quarts for 50c.

PEAS

Alaska—A wonderful early, smooth, blue pea; vines slender; pods very dark green, about three inches long, well filled with small smooth, blue-green peas. Pt. 15c; 25c qt.

McLean's Little Gem—An old variety still largely grown and quite early. It is productive and the peas are of high quality. Pt. 15c; 25c qt; 4 qts for 90c.

Telephone—The favorite late variety; extra large pods. This pea has proved to be a most valuable introduction. The pods are very large, filled with immense peas, which are largest of any. Pt. 15c; 25c qt.

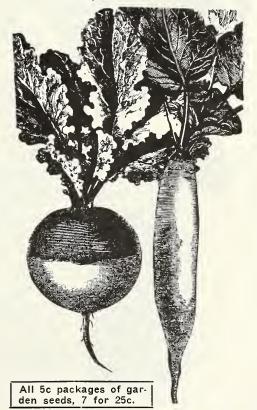

PARSNIPS

Hollow Crown—Our selection of this highly esteemed vegetable is surely the best for private garden. This is a shapely, heavy shouldered strain with its greatest girth at the crown and gradually tapering to a small roor Pkt. 5c; 10c oz.

RADISH

Early White Turnip—Very popular as a market radish, having small tops and making a very rapid growth. Bright red shading off to white at the tip. Pkt. 5c; 10c oz.

White Icicle—A very popular long radish with white skin. Very rapid growth, being ready for use in less than 30 days. A good keeper. Pkt. 5c: 10c oz.

Early White Turnip

White Icicle

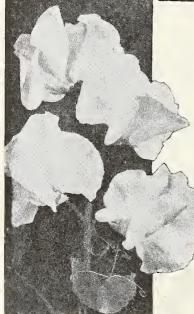

Long Scarlet Short Top—A favorite for market varie ty; early and handsomely colored. Pkt. 5c; 10c oz.

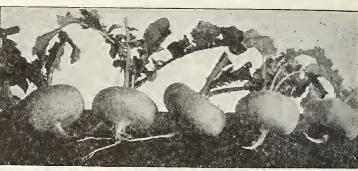

SPINACH

Round Thick Leaved—A standard variety, valuable for spring planting. Forms large thick leaves of good quality Pkt. 5c; 10c oz.

TOMATO

Stone-A very fine red

Purple Top White Globe Turnip

tomato; splendid for main crop; used largely for canning. It is a great bearer, the fruit is large and smooth and first-class in every way. Pkt. 5c; 15c oz.; \$1.50 lb.

TURNIP

Purple Top White Globe—Our special strain of this turnip is extra fine. It has small tops and the roots are very uniform, fine grained and of mild flavor. Pkt. 5c; 10c oz.; 20c 1/4 lb.

WATERMELON

Kleckley's Sweet—Where sweetness combined with large size is desired this variety will surely please; it has that crisp, sugary flavor so much desired. Pkt. 5c; 10c oz.; 25c ¼ lb.

LAWN GRASS

Best mixed lawn grass seed, 25c lb.; 5 lbs. for \$1.00.

MORNING-GLORY

Common Morning Glory—All colors, finely mixed. Very popular. Tall. Pkt. 5c; 15c oz.

Common Morning Glory—Dwarf. All colors. Pkt. 5c;

SWEET PEAS

A very choice mixture of all the best Sweet Peas. Fancy. Pkt. 10c; 15c oz.

The "Kant Klog" Sprayer

SPRAYS TREES, ALL KINDS OF SMALL FRUITS AND GARDEN VEGETABLES, DISINFECTANTS, WHITE-WASH AND MANY OTHER USES

"Kant-Klog" Nozzle. The only nozzle that can be successfully cleaned without stopping the spray or removing nozzle from the tree. The only nozzle ever made to give both flat and round sprays or solid streams.

Spring Hose Cock. A slight pressure starts the spray. Remove it and spray stops instantly. Saves time, labor and fluid.

Sprayer Body. Made of Galvanized Steel or heavy Polished Brass as desired. Top and bottom dome shaped—joined to body under heavy pressure making a complete double seam. Tested under high pressure thereby avoiding troubles experienced with other constructions.

Air Pump. Heavy Brass two inches in diameter.

Hose Couplings. Solid Brass, standard cut threads, Hose high grade three-ply.

Safety Valve. Allowing air to escape after desired pressure has been obtained.

Admitted by all to be the best fitted-most complete and satisfactory sprayer on the market.

Price \$4.50 Galvanized; \$6.00 for Brass Body.

Planet Jr. Garden Tools

By using these labor-saving tools, growers may safely plant and éasily cultivate four times the acreage that they otherwise could do; or if not wishing to increase the amount grown, the time and money saved by the use of wheel hoes soon exceed their first cost.

NO. 11 PLANET JR. DOUBLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE The hoes are the most valuable of all the wheel hoe attach

The hoes are the most valuable of all the wheel hoe attachments; are oil tempered and polished. Use the 4-inch for 6, 10 or 12-inch rows; the 6-inch, for rows 12 inches and upwards.

The plows are invaluable; use them with points together for opening furrows for manure, seed, etc.; then exchange sides for covering; use them also for plowing away from or toward the crop, both sides at once.

The cultivating teeth for deep or shallow work, and for marking out.

Leaf lifters save time and enable fine work to be done close to the row without additional labor, when plants are large or leaves are flat on the ground.

16 PLANET JR. SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

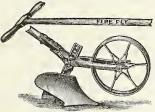

We offer these Single Wheel Hoes as the highest type of their class. They have a great variety of tools which adapt the implements to a large variety of work, and there is scarcely any garden culture of which they are not capable.

The handles are adjustable in height. The frame is steel, convenient and strong with quick change device by which to exchange the tools without removing the nuts.

All our wheel hoe tools are of a special pattern, carefully tested by practical men; no others ever offered compare with them. All the steel parts are high carbon steel, oil tempered, finely formed, finished and polished and work to a charm.

FIRE-FLY GARDEN PLOW. PRICE \$2.35.
This Tool is exceedingly useful to owners of small gardens. It will throw a furrow four to six inches wide and one to three inches deep, and deeper by going twice. Furrows for manure or seeds can be opened and covered. In cultivating, plow away, weed the row and plow back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden. Chicken raisers find it of great advantage in plowing up their scratching yards.

PLANET JR. TWELVE-TOOTH HARROW, CULTIVATOR AND PULVERIZER

Gardeners cultivate better than formerly. It has been found to pay best. With the Twelve-Tooth Harrow you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a special favorite with strawberry growers, market gardeners and truckers.

Complete, with Steel Wheel, \$8.75. Weight, packed, 74 lbs. Without Pulverizer, \$7.65. With Cast Wheel, deduct \$0.25. Without Pulverizer or Wheel, \$6.20.

Planet Jr. Garden Tools

The New "PLANET JR." Catalogue is the handsomest, best, and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mail it free to any address on application.

NO. 4 PLANET JR. COMBINED HILL AND DRILL SEEDER, WHEEL HOE, CULTIVATOR AND PLOW

For use as a cultivator, the drill parts are removed and the tool frame substituted by changing but one bolt; it is then a perfect single wheel hoe, with a variety of tools, and a rapid change frame, with side extension for hoeing both sides of a row at one passage.

If your garden is small, you may break it up with the turning plow, running twice in a furrow and as deep as possible; if large, a horse plow should be used or the ground should be well spaded. In seeding,

drop beans, parsnips, spinach, carrots, turnips, onions, beets and okra, in hills; sow your peas and celery, cabbage for plants and onion seed for sets in drills.

Plants in hills 4, 6, 8, 12 or 24 inches apart.

Price, Complete \$10.50. Weight 50 lbs. As a Seeder Only, \$8.50. Holds 2½ Quarts of Seed.

NO 25 PLANET JR. COMBINED HILL AND DRILL SEEDER, DOUBLE WHEEL HOE, CULTIVATOR AND PLOW

The simplicity of this tool, both as a seeder and as a wheel hoe, makes the combination thoroughly practical.

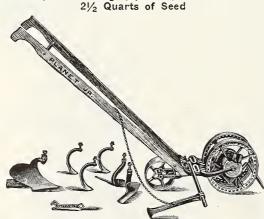

The hoes are of a special patented form, which enables the operator to run very close to the row

without endangering either leaves or roots, yet doing clean work and leaving the ground almost perfectly level.

Two acres a day can easily be worked with this implement, and when it is done, it will be a better job than several men could have done in the same time with hand hoes.

done in the san hoes.

Price \$13.00. Weight, packed, 61 lbs. Holds

Price, with Tools as shown, \$9.00 the band the Holds 3 Pints of Seed. Weight, packed, 47 lbs. closing it.

NO. 1 PLANET JR. COMBINED DRILL SEEDER, WHEEL HOE, CULTIVATOR AND PLOW

The sowing cylinder is a drum of spring brass set between the driving wheels, with a sliding brass band and cam. In drum and band are corresponding diamond shaped discharge openings, quickly adjusted for any kind of seed. Inside the drum, shields cover the openings, and insure regular sowing with a full hopper or a thimbleful.

The index contains the names of the principal seeds. The drill is set right for any seed when the name appears through the slot. The change is made by opening the cam, sliding the band to the required place, then closing it.

ORDER SHEET. ERNST NURSERIES, EATON, OHIO.

Care should be taken in filling out shipping directions, as it often occurs that Express and Freight Office is in different County or State than your P. O.

AN OLD HOME MADE OVER WITH MODERN CONVENIENCES AND PLANTED TO SHRUBBERY

A NEW UP TO DATE HOME, BUT WOULD NOT BE COMPLETE, WITHOUT THE PLANTING OF TREES, SHRUBS AND VINES
